Tropic Lightning Strikes in Same Place
3d Time; Triple Deuce Breaks Ambush

By SP4 D. J. Caldwell

DAU TIENG — Tropic Lightning struck in the same place for the third time in three months when 3d Brigade soldiers smashed an enemy attempt to ambush a convoy near Dau Tieng recently.

History repeated itself as mechanized infantrymen of the 2d Battalion (Mech), 22d Infantry, Triple Deuce, supported by artillery and helicopter gunships, decimated a North Vietnamese Army reinforced battalion.

As on two previous occasions, the convoy was traveling on Route 239 near the edge of a heavily wooded area 11 miles east-southeast of Tay Ninh City, when the North Vietnamese opened up with small arms and RPG fire.

The enemy ambush was ill-starred from the beginning.

Among the first to spot the entrenched enemy was Colonel Louis J. Schelter, commander of the Tropic Lightning 3d Brigade, who was flying overhead in his command and control helicopter.

SCHETLER AND Lieutenant Colonel Vernon B. Lewis of Marshall, Tex., commander of the 2d Battalion, 77th Artillery, began calling in artillery on the enemy positions.

Meanwhile Lieutenant Colonel Ralph M. Cline of Rockville, Md., Triple Deuce battalion commander, committed his Alpha and Bravo companies to reinforce Charlie Company.

From his helicopter above the battleground, the brigade commander spotted an enemy platoon running across an open field.

As the aircraft, commanded by Warrant Officer 1 Gunther Siedler of Torrington, Wyo., blasted away, killing several enemy, the mechanized riflemen of Charlie Company Triple Deuce moved in to sweep the enemy force from the area.

As Bravo Company pulled up to join the fight, they ran into an enemy bunker and spider hole position. Company Commander Captain Jack Johnston of Missoula, Mont., called in airstrikes to assist his men in routing the enemy from their positions.

Alpha Triple Deuce, commanded by Captain David Crockker, Old Mystic, Conn., encountered a group of NVA fleeing in the open north of the ambush site and stopped the enemy in their tracks with a wall of machinegun fire.

LEWIS CALLED in deadly fire from Alpha Battery, 2d of the 77th Artillery, Alpha Battery 1st Battalion, 22d Artillery, Charlie Battery, 2d Battalion, 32d Artillery in Dau Tieng base camp and Bravo Battery, 3d Battalion, 13th Artillery in Fire Support Base Wood.

All-Volunteer Company Takes on Job
As Guardian on Peak of Nui Ba Den

TAY NINH — Nui Ba Den, the legendary mountain that looms high above Tay Ninh Province, in War Zone C, has a new security force atop her majestic perch.

Tropic Lightning soldiers of the 1st Brigade, 25th Infantry Division, were offered the chance to volunteer for duty atop her mighty pedestal.

The new security company, an innovation introduced by divisional adjutant Biscoff of Gallup, N.M., "I'VE BEEN up there before; the duty was just great. The climate is cool, a soft breeze makes Vietnam bearable, and I can't wait to get back," stated Specialist 4 Jesse Ware of Birmingham, Ala. Both Biscoff and Ware served previously with Company A, 41st Battalion, (Mechanized) 25th Infantry.

Tomahawks Pitch Teepees on VC,
MVA U. S. Bases in Saigon
**TAY NINH — Nul Ba Den, the legendary mountain that looms high above Tay Ninh Province, in War Zone C, has a new security force atop her majestic perch.**

Tropic Lightning soldiers of the 1st Brigade, 25th Infantry Division, were offered the chance to volunteer for duty atop her mighty pedestal.

The new security company, an innovation introduced by division headquarters, will man the bunker line that protects the valuable communication system atop the “Black Virgin.”

**THE OLD METHOD of having an infantry company guarding the precious equipment was not practical. Headquarters decided.**

By having an all volunteer force, the infantry can be used in their trained role — to search for the enemy, instead of acting as a permanent bunker guard.

“The defense and security of the fabled mountain is the tightest in Vietnam. My men are well trained and versed in their special role,” said the security company commander, Major Ronald L. Baker of Rapid City, South Dakota.

The Tropic Lightning soldiers do not hesitate to volunteer. Atop Nul Ba Den the heat of the jungle is soon forgotten, the peace and tranquility that exists on the mountain makes life pleasant.

“I was surprised when I heard they wanted volunteers to serve on the mountain. I didn’t waste a minute getting my name on the list,” said Specialist 4 Ed...
TAY NINH — "It was really an interesting experience, a chance to see how the Vietnamese live, a chance to learn a lot about how they're different from us, and how we're all the same."

That was the reaction of Private First Class Gerald W. Windhorst, Louisville, Ky., to spending a week living and working with a South Vietnamese Army unit in Tien Thom village, 16 miles southeast of Tay Ninh.

Windhorst was part of a squad from the 4th Battalion, 9th Infantry Manchus B Company who made the mile-and-a-half trip from Fire Support Base Sedgwick for the week's stay at the village.

THE SQUAD, led by Sergeant Pete Bauer, Bismarck, N.D., worked joint ambush patrols with the ARVN forces at night, and during the day tried out Vietnam's food, customs and language.

"We learned right away that those ARVNs really know what they're doing militarily," Bauer said at the end of the week.

Private First Class Rudy L. Hopkins, Box 183, Adairsville, Ga., "did the best at picking up the Vietnamese language," according to Windhorst.

WINDHORST SAYS he was struck by the Vietnamese's generosity.

Windhorst added that he'd like to spend some more time in the village.

"It was really worth our while," he said. "I think there was a big increase in our understanding of each other after that week."

Warriors Turn Tables on Enemy Mortar Squad

By Sp4 P. A. Brown

CU CHI — Somewhere there is an enemy mortar squad that must still be wondering what happened to its mortars and rockets.

A squad of 2nd Battalion, 12th Infantry soldiers, after discovering an enemy rocket launching site, turned the launch pads so that all the rockets would land off target.

THE 2ND BRIGADE White Warriors were on a sweep around their fire support base when the point man spotted the first position.

"When I first spotted it, I was sure it was a mortar position," said Specialist 4 Jack Short, of New Port Richey, Fla.

"It was complete with aiming stakes," added Specialist 4 James Howard of Daytona Beach, Fla. "We continued searching the area and found a rocket launching position."

THE "MOD SQUAD," as it is called, decided to play the trick on the enemy.

"We decided to challenge those mortars," said Sergeant Darril

Choppers Add Firepower, Light to Diamond Defense

By lLT Bernardino Vargas

CU CHI — Seconds after the first enemy fire slammed into Patrol Base Diamond III, three-minute alert gunship crews of the 25th Aviation Battalion's Bravo Company were sprinting for their aircraft.

Responding to the base's 3 a.m. call, the Diamondheads guided their Cobras through gathering overcast toward the action and were quickly directed in to the assistance of the embattled infantry.

They found the scene of the action covered with low clouds and were forced to work down in the cauldron of fire that Patrol Base Diamond III had become.

Swooping in by the light of flares flickering eerily on the low clouds, the Diamondheads scourged the attacking NVA with mini-gun and rocket fire.

Under direction of the ground commanders, the gunships engaged the enemy right up to the edge of the perimeter.

With the pressure on the infantry eased, the Diamondheads pounded on 30 caliber machine gun positions that had been trying to break up the helicopter attacks. Eight were suppressed with rocket fire.

Diamondhead fire teams alternated on station over Diamond III all through the attack. By 5:15 a.m. all the NVA who weren't on the ground were going some place else, and the firing died down. The gunships continued to orbit protectively over the base until 9 a.m.

Self-Defense Force Gives Lesson to Viet Cong Trio

CU CHI — People's Self Defense Forces soldiers have won the respect of both American and ARVN military personnel in Vietnam for their determination.

Cong killed and captured weapon just outside the village, the ambush team was in wait for it.
All ashore that's going ashore—Manchus of the 4th Battalion, 9th Infantry, inch their way across a thin plank that affords the only way of crossing a deep stream. All of the troops made it across and kept their powder dry, with the first and last men across providing security.

Self-Defense Force Gives Lesson to Viet Cong Trio

CU CHI — People's Self-Defense Forces soldiers have won the respect of both American and ARVN military personnel in Vietnam for their determination and ability.

Frequently their forces are small and their equipment is limited, but for sheer desire and ability these civilian soldiers have shown themselves a valuable part of the military effort in Vietnam.

Recently a PSDF team from Cu Chi District, 25th Infantry Division area, gave a demonstration of their effectiveness near the village of Ap Cho. The four-man team set up an ambush which netted them three Viet Cong killed and captured weapons.

Just outside the village, the ambush team lay in wait for a VC patrol expected to pass through in the early morning.

When the VC did approach close to the PSDF position, the local soldiers opened up, killing all three VC and capturing two rifles and one pistol.

"The self defense force action against the VC clearly shows that the Vietnamese people do care and are taking positive steps to counter the enemy," said Colonel H.S. Long, commanding officer of the 2d Brigade. "We salute the PSDF of Ap Cho."

Bobcats Build Underground Theater at FSB Patton

By Sgt Jan F. Anderson
CU CHI — Ever imagine a theatre of the underground in Vietnam? You say you doubt the Army would furnish the type of entertainment you watched back in the world, in Greenwich Village or Haight-Ashbury?

Mechanized infantrymen of the 1st Battalion (Mechanized), 5th Infantry have possibly one of the most formidable of underground theatres.

At Fire Support Base Patton, the infantrymen decided they needed an occasional break from chasing Charlie. With the encouragement of Lieutenant Colonel William E. Klein, battalion commander, the troops began to dig.

In one week a large hole altered the landscape of Patton. Timbers, portable steel pavings, and sandbags formed a roof sturdy enough to resist rocket and mortar attacks. In no time the underground theatre moved from an idea to a reality.

Each night infantrymen can see such favorites as "Casino Royale", "Hang 'em High", "Return of the Seven".

Sergeant Anthony Pappalardo of Bronx, N.Y., commented, "I'm afraid we'll all be rescued in a mystery some night and turn around to find the Viet Cong watching, too. Of course, records are always rotated so we need not fear."

FSB Patton's underground theatre may not be advanced new art forms but it provides a very important function. It relaxes the infantryman and allows some of his tensions to drain off.
Wolfhounds, Arty, Gunships Kill 198

DIAMONDS ARE FOREVER

PATROL BASE DIAMOND — Dawn's first light shows sweat, dirt and exhaustion engraved on their faces. Some try to sleep, others stare blankly into the distance. A few talk. A deep weariness prevails over the sweet smell of gunpowder.

Four hours ago an estimated two battalions of North Vietnamese Regulars swept across the Cambodian border and burrowed themselves at the Fire Brigade's 2nd Battalion, 27th Infantry in this tiny patrol base on a dry open plain. The Wolfhounds fought for their lives, and now it shows.

The men of Alpha and Delta Companies killed 198 NVA Regulars in a battle they will talk about for years and remember for a lifetime. Twenty five hours ago they dismantled Diamond II and moved it, gun, beam and sandbag to this new position, a job which would normally require three days.

Working swiftly against time the entire battalion carved a defensive position which had to hold. The enemy had attacked on the first night in the previous position and would likely attack again here.

At midnight, Patrol Base Diamond III was ready. Guards were posted and the infantrymen tried to rest.

As the guard changed at 0300, movement was detected 800 meters to the southwest of the perimeter. The command post was notified and the first night in the previous position and would likely attack again here.

The enemy had attacked on the first night in the previous position and would likely attack again here.

The NVA had lifted the mortar attack to allow their assault troops to move closer. Earlier that evening, three listening posts had been established, one to the west, one to the north, and one to the south. Wolfhounds at the western LP took advantage of the lull to break for the patrol base.

It was the most intense mortar attack that I have ever experienced, twice as bad as the attacks on Diamond I and Diamond II,” said 1st Lieutenant James J. Sullivan, Chaton, N.J.

Experienced troopers knew that the time had come to get out of their bunkers and fight from the prepared positions. “Getting out of that bunker,” said Specialist Four Paul Gafter of Elkins, No. Carolina, “was one of the hardest things I have ever done. But I kept remembering what could happen if I remained.”

The NVA regulars proved themselves creatures of habit as, true to form, they launched the second phase of the attack with a hail of RPG's and small arms fire. The NVA Battalion had moved forward under the mortar fire and were launching their deadly rockets from within 50 meters of the perimeter.

They made it. The post to the east suffered several casualties, while the post to the north held, kept low, and had no injuries.

Major Calvin Swenson, Diamond's Commander, from Wilson, No. Carolina, estimated that 400 RPG's struck around the base. Time after time positions took direct hits, but none were knocked out.

The men, fighting outside their bunkers, kept the enemy from getting close enough to accurately fire their weapons. Each bunker had an M-60 machinegun, and many had 80mm recoilless rifles. The Wolfhounds knew how to use them.

As the RPG's rained in, sapper squads closed in the perimeter's defensive wire armed with bangalore torpedoes and AK-47's in a desperate attempt to breech the line. Specialist Four William Baumgardner of Huntington, Pa., recalled: “They blew the wire to the front and right of my position. So we had a lot of fire in that direction. We were ready for them, and they never got inside.”

Flare ships and night lighting aircraft circled above illuminating the scene as dust and debris rose, from rounds impacting on both sides.

The beleaguered infantrymen
On April 5th and 6th in the second round of battle for the Diamond Patrol bases along the Angel's Wing, two companies of the 2d Battalion, 27th Infantry Wofhounds wrecked two battalions of the North Vietnamese Army, killing 117.

Shortly after 1 a.m. on April 5th, troops detected a small group of people 800 meters from the perimeter. Specialist 4 Kenneth Brink of Laingsburg, Mich., said, "They were moving around in one location, and were apparently setting up a mortar position." Other detected groups moving around the base drew artillery fire.

Then, at 1:30 a.m., the enemy began mortaring a listening post 200 meters west of the base's wire. This fire was quickly shifted into the perimeter.

"We got up to look around," said Specialist 4 Kenneth Brink of Laingsburg, Mich., "and the first thing I saw was a whole bunch of enemy soldiers running right at us. It reminded me of an end run going through my position in a football game."

The NVAs had apparently been planning on using the cover in the listening post's site to place fire on the perimeter, said Specialist 4 Algher Griffin of Rochester New York. "They were carrying a heavy weapon of some sort. We changed their plans when we opened up on them."

From their vantage point, the Wolfhounds saw the enemy thunder at the perimeter in vain. None reached the wire, deadly rounds fired from leveled howitzers, devastating airstrikes of pinpoint accuracy and fierce small arms fire saw to that.

Five a.m. found the enemy blasted by Wolfhounds and retreating from the coming dawn. "The battle was actually over almost before it got started," said Specialist 4 Algher Griffin of Rochester New York. "They were carrying a heavy weapon of some sort. We changed their plans when we opened up on them."

With the coming of full light, the Wolfhounds policed up the debris of their victory. Found were 51 Chi-Com grenades, 3 Bangalore torpedoes, 24 RPG rounds, 14 RPG launchers and 21 AK assault rifles.

The enemy, normally scrupulous about taking his dead from the battlefield, left behind 81 bodies in his flight.

On April 6th an even more abortive attempt was launched on Patrol base Diamond II, as artillery and gunships killed 36 NVAs. They got no closer to the wire than 1,200 meters.

Soldiering is a profession, and you must be a professional. Know the tools of your profession—weapons and explosives—and treat them with respect. Share your knowledge with those you work with, and don't be afraid to ask questions of them. Remember that the next mistake you make could be your last.
SAIGON—The control and proper use of money are of great importance in Vietnam.

Illegal currency transactions—black marketing in money—harm our own war effort and the economy of Vietnam.

Sound money is a basic requirement for war just as it is for a stable economy. This is why the Military Assistance Command, Vietnam, in co-operation with the government of the Republic of Vietnam, has issued strict regulations on the handling and circulation of money in the command.

Failure to comply with these regulations can result in severe consequences for the individual service member, the government, and the country. All regulations are intended to explain what the regulations are and how to follow them.

Q. Why do we use MPC?
A. MPC, Military Payment Certificates, is our national currency. It is a substitute for "green" U.S. dollars. MPC is issued in areas, such as Vietnam, where the free circulation of dollars would result in black marketing and purposes which would harm the U.S. or the host country.

The U.S. dollar is one of three international currencies. It will buy goods in any market in the world. Many countries do not accept U.S. dollars. But, they will accept MPC, a substitute for U.S. dollars.

This is particularly true of communist nations which do not have normal trade relations with the free world. It is used in many areas of North Vietnam and Red China.

There is another side to this problem. MPC, in a free market economy, needs to keep its money to honor obligations. MPC can be used to pay for goods, services, or elsewhere, placed in circulation, and it can be used to purchase goods from Vietnam or other areas where MPC is accepted.

Q. Can I exchange my MPC for dollars?
A. MPC can be exchanged for dollars, but the exchange rate may vary. It depends on the demand for MPC and the supply of dollars in the market.

Q. What are MPCs worth in dollars that get on the black market?
A. Black market dollars can end up as payments for ammunition, weapons and supplies. U.S. dollars are gathered here and smuggled to places like Hong Kong and funnelled into China or other communist countries. The communist countries have major markets with many international banks and with millions of suppliers throughout the world. In effect, the dollars are illegally used to buy goods from the black market.

Q. What happens if I have MPCs?
A. If you have MPCs, you should turn them in to a financial officer.

Q. How do we prevent MPC from going on the black market?
A. MPCs are used for trade in Vietnam. They are exchanged for goods and services. They are also used as currency in the free market economy. MPCs are exchanged at a fixed rate with other currencies.

Q. Why can't we convert MPCs to other currencies?
A. MPCs are not convertible to other currencies. They are only convertible to other currencies when they are purchased in the free market economy. MPCs are not convertible to other currencies when they are purchased in the free market economy.

Q. Why can't we convert MPCs to other currencies?
A. MPCs are not convertible to other currencies. They are only convertible to other currencies when they are purchased in the free market economy. MPCs are not convertible to other currencies when they are purchased in the free market economy.
problem. Vietnam, like many nations, needs to keep its money at home to provide capital for growth. People in Vietnam who convert plasters to dollars have a currency which they can get out of the country, leaving the Vietnamese economy poorer.

Q. Who is authorized to have MPC?

A. MPC are for use only in U.S. facilities and only authorized personnel are not authorized to possess MPC. All transaction in RVN between U.S. authorized personnel and unauthorized personnel will be consummated in plasters.

Q. If I accidentally get into a position of having no plasters with me, can I pay, say, a taxi driver in MPC?

A. Definitely not. You giving MPC to him is worse than both. It might not be your fault that he had MPC before, but it sure is if you give it to him.

Q. What about when a commander changes its MPC, changing the size or design, calling in the old and issuing new? What's that for and how do they do it?

A. It's done to spoil as many crooked operations as possible, to catch illegal operators who try to get away with them.

Q. Where can I convert MPC to plasters?

A. Only at authorized conversion points operated by the U.S. agencies, in many billets, compounds, etc.

A. Only up to 500. Written permission of the RVN government is required for you to take out or bring in more than 500 plasters.

Q. If someone asks me to change his MPC into plasters, can I do it?

A. It's done to spoil as many crooked operations as possible, to catch illegal operators who try to get away with them.

A. Definitely not. You giving MPC to him is worse than both. It might not be your fault that he had MPC before, but it sure is if you give it to him.

Q. What about when a commander changes its MPC, changing the size or design, calling in the old and issuing new? What's that for and how do they do it?

A. It's done to spoil as many crooked operations as possible, to catch illegal operators who try to get away with them.

A. Only at authorized conversion points operated by the U.S. agencies, in many billets, compounds, etc.

A. Only up to 500. Written permission of the RVN government is required for you to take out or bring in more than 500 plasters.
C Company Total Soars to 154 for Year

Manchu Company Earns 60 Medals

TAY NINH—When 60 medals for valor were awarded to soldiers of the 4th Battalion, 9th Infantry Manchus' Charlie Company in a special ceremony March 31, it brought to 154 the total of combat decorations the company has received since the start of 1969.

THOSE 60 decorations, for a battle January 26, coupled with medals distributed in two ceremonies earlier this year brought the company's 1969 tally to one Distinguished Service Cross, 12 Silver Stars, 44 Bronze Stars with "V"s, and 97 Army Commendation Medals with "V"s.

The other medals were earned Dec. 22, 1968, when the Manchus fought off a North Vietnamese Army regiment's attack on Sedgwick, which was then Patrol Base Mole City.

In the January 26 action, C Company was flown by helicopter from Sedgwick to join the 3d Squadron, 4th Cavalry, as a blocking force to bottle up a Viet Cong company which had invaded Phuoc Luu, a small village 40 miles northwest of Saigon.

USING BUILDING materials shipped from Tay Ninh by helicopter, the Manchus dug in for the night, working until midnight to construct bunkers with overhead cover.

When the VC unit attacked around 1 a.m. in an attempt to push through the U.S. barrier, the bunkers proved invaluable. Only one Manchu was wounded, not seriously, as the Tropic Lightning units battered the enemy force, recording an official total of 15 killed and capturing a truckload of weapons and equipment.

In presenting the latest group of medals, Wilson praised his C Company troops as a "proven fighting unit."

AWARD CEREMONY—Soldiers of C Company, 4th Battalion, 9th Infantry, salute their battalion commander, Lieutenant Colonel Leo L. Wilson of Salina, Kans. (far left), at the end of a ceremony in which 60 of the company's men received medals for valor.

Enemy in NVA, VC Lair

CU CHI—One hundred forty-three North Vietnamese soldiers died at the hands of 2d Brigade and supporting fire five miles northeast of Trang Bang in two days of close force fighting.

On the first morning of the two-day battle, Fire Brigade troopers made a helicopter assault into enemy-infested area.

"We were just getting spread out when Charlie opened up," said Private First Class Vernon Turner of Washington, D.C. WITH GUNSHIPS providing cover, the infantrymen regrouped to mass firepower on the enemy.

One unit commander, Captain Robert B. Powell, commented, "Charlie might have had us but we blasted our way back with the aid of gunships."

Each time the Fire Brigade infantrymen advanced, they were greeted by intense small arms and .51 caliber fire.

STALKING elements from C Company, 1st Battalion (Mechanized), 5th Infantry, move out with the Dreadnought Task Force during a sweep in the Filhol Plantation. The Fire Brigade operation is under the control of the 2d Battalion, 34th Armor.

(ASS AFRITERY and air strikes pounded the enemy's underground fortress, regular and mechanized infantry forces were called in to reinforce their comrades and help conduct a sweep of the area.

As the task force began its sweep, it was again greeted by automatic weapons and RPG fire from the entrenched enemy.

First Lieutenant Louis M. Geitka reported that it was "just like trench warfare" as the Tropic Lightning soldiers moved forward to rout the persistent enemy.

"We fought from dike to dike and bunker to bunker," said Geitka.

As fire ceased and the sweep was concluded, 76 NVA bodies were discovered along with three RPD machineguns, six AK-47s, five RPG launchers and a .51 caliber machinegun.

THE FOLLOWING day a combined armor-infantry task force moved out to combat-assault the area.

As soon as they got started they received mortar, small arms, automatic and RPG fire from the north.

Armed personnell carriers and tanks were called in to aid the infantrymen once more.

As the combined force fought against the North Vietnamese troops on the ground, air strikes, gunships and 81mm mortars rained shrapnel on the enemy.

AGAIN AS fire ceased the Fire Brigade soldiers began a sweep of the battlefield and they received fire from a well hidden enemy force. After an hour duel the last round flew overhead, and the Tropic Lightning infantrymen continued the sweep.

Tallied on the second day of fighting were 76 NVA bodies, one light machinegun, 21 AK-47s, 15 RPG launchers, three .51 caliber machine guns, three carbines and assorted munitions and documents.
Bobcats Repel NVA Attack, Slay 33

By SGT Jan F. Anderson

CU CHI — Fire Brigade soldiers from the 1st Battalion (Mechanized), 5th Infantry Bobcats repulsed an unknown size enemy force April 10, forcing an NVA unit to leave 33 dead comrades just outside a U.S. laager site only an hour after the communist attack started.

There were no friendly casualties during the hour-long fight six miles northeast of Trang Bang.

EARLY DETECTION of the attack was the Bobcat's key to success.

Sneaking close to the mech soldiers' position in an open rice paddy, five NVA had crawled to within ten meters of the concertina wire ringing the men and their APCs. At 0230 hours, Staff Sergeant Richard Hautekeete, Grinnell, Iowa, a platoon sergeant, sounded the alarm after spotting the enemy quintet through his starlight scope.

Hautekeete quickly advised the commander of one of three tanks from the 2d Battalion, 34th Armor on his flank of the danger to his front. A well-aimed round would eliminate those five.

The first round from the tank's 90-mm cannon missed its mark, but number two killed all five, as the morning sun was later to show.

CAUGHT OFF balance by the early detection, the enemy was forced to begin his assault prematurely. While mortars and RPGs rained on the Bobcats, teams of enemy troops moved into position for a human wave thrust against the wire.

Ground-mounted .50 caliber machine guns with their grazing fire inches above the ground, mortar tubes arcing 81-mm high explosive rounds, and claymore mines, plus helicopter gunships and an Air Force AC-130 Spooky gunship, all served to effectively stifle the NVA charge.

First Lieutenant Jeffrey McGrath, Mattituck, N.Y., executive officer of the Bobcat unit, said the enemy used a wedge-shaped formation to fix the brunt of their attack on one point.

McGrath said the enemy repeatedly tried to blow apart the concertina wire with bangalore torpedoes, each effort meeting with streams of automatic weapons fire.

"They came looking for a fight, and we gave them one," he said.

Specialist 4 Walter Bromwell, Baltimore, Md., gave the tanks a lot of credit.

"FORTUNATELY FOR us they hit right at the point where the tank was," Bromwell said. "The big gun was more than a match for them."

Tomahawks Check Charlie's Caches

RF Help Dig Up Bunker Complex

TAY NINH — Smashing through dense jungle, 11 miles northeast of Tay Ninh City, South Vietnamese Regional Force elements, working with Company B, 4th Battalion (Mechanized), 2nd Infantry, found a mammoth enemy weapons and munitions cache in a bunker complex.

After finding the complex the one Chinese light machinegun, one Chinese sub-machinegun, 38 bangalore torpedoes, 300 .51 caliber rounds, 500 AK-47 rounds, 30 pounds of Chinese TNT, 80 RPG boosters, 75 cans of mortar charges, 500 rounds of 76.2mm ammunition, and 2000 feet of commo wire.

Near the first bunker was another containing 1000 mixed 57mm and 75mm recoilless rifle rounds, 650 mixed 20mm and 82mm mortar rounds.

VC Troops Say Farewell to Arms

TAY NINH — First Brigade troops of the 25th Infantry Division uncovered two separate weapons caches while operating in the Crescent area 12 miles east of Tay Ninh City.

Two companies of the 4th Battalion (Mechanized), 2nd Infantry, Tomahawks uncovered the caches two miles apart.

1500 rounds of .36 caliber ammo, 3 SKS rifles, 3 bolt action rifles, one semi-automatic rifle, two Chicom machineguns, one medium machinegun, one 82mm mortar (base plate and tube), 10 bangalore torpedoes, and 27 82mm mortar rounds.

"We were on them so fast they didn't know what hit them. The VC tried to make a stand; they sure didn't want to lose all that stuff," said Sergeant Stanley Frew, of Des Moines, Iowa.
TAY NINH—Smashing through dense jungle, 11 miles northeast of Tay Ninh City, South Vietnamese Regional Force elements, working with Company B, 4th Battalion (Mechanized), 23d Infantry, found a mammoth enemy weapons and munitions cache in a bunker complex.

After finding the complex the Regional Forces advanced cautiously to check the area for enemy soldiers.

After a thorough search was completed and security put out, the R.F.'s searched the large bunkers. In the first bunker most of the bounty was found.

Inside were two RPD machineguns, one AK-47, 14 SKS rifles, one Thompson sub-machinegun, one Chinese sub-machinegun, 30 bangalore torpedoes, 300 30mm caliber rounds, 500 AK-47 rounds, 30 pounds of Chinese TNT, 60 RPG boosters, 75 cans of mortar charges, 500 rounds of 7.62mm ammunition, and 2000 feet of cammo wire.

Near the first bunker was another containing 1000 mixed 37mm and 75mm recoilless rifle rounds, 650 mixed 60mm and 81mm mortar rounds, 25 large Chinese claymores, 75 B-40 rockets, 65 B-41 rockets, and 1500 electric fuses.

"We've been finding a lot of material that belongs to the enemy, but not anything as big as this in the last few months. It was a fantastic find," said Captain Luther DeWalt of Okinawa, commanding officer of Bravo Company.

Two companies of the 4th Battalion (Mechanized), 23d Infantry, uncovered the caches two miles apart.

One company was working its way into a woodline when it was met by small arms fire. As the U.S. troops pushed forward, the VC fell back, leaving one dead comrade. The thick jungle thinned, out revealing a 30-bunker storage area. The VC in their hasty retreat left a large amount of military bounty.

The Tomahawks policed up 3 SKS rifles, 5 bolt action rifles, one semi-automatic rifle, two Chicom machineguns, one medium machinegun, one 81mm mortar (base plate and tube), 10 bangalore torpedoes, and 21 82mm mortar rounds.

“We were on them so fast they didn't know what hit them. The VC tried to make a stand; they sure didn't want to lose all that stuff," said Sergeant Stanley Frew, of Des Moines, Iowa, a squad leader.

The Tomahawks' Alpha Company was checking out a suspected VC bunker complex when it came upon a small base camp with enemy equipment strewn all over.

"After setting up security around the small base camp we started checking out each bunker. Somebody left in a big hurry. We had a real Easter egg hunt," said Specialist 4 Richard Langner, of Willowick, Ohio.

The other company found 3 SKS rifles, one bolt-action rifle, 25 RPG-2 rounds, 25 RPG boosters, 2750 rounds of assorted small arms ammo, 10 pounds of TNT, 80 automatic rifle clips, and 49 60mm mortar rounds.

CU CHI — 2d Brigade, 25th Infantry Division troops rushed to the aid of Xon Ben Moi village after terrorist fires left 70 families homeless recently.

Xon Ben Moi, a small Tay Ninh Province village, was set aflame about midnight for no apparent reason by terrorist. 42 hooches were completely destroyed in three hours of systematic burning. The villagers were allowed to escape. After the fires had been set, the VC cleared out of the area.

Brigadier General Edwin F. Ehrhart, Assistant Division Commander, heard of the incident and knew 2d Brigade units were operating in the vicinity of the village. He ordered that food and supplies be taken to the village immediately.

Helping Hand and other civic action groups gave the villagers 7,000 pounds of rice, 40 cases of staple foods, and 70 gallons of cooking oil the morning after the attack.

“We gave the food directly to the hamlet chief, and it was handed out by his men," said 2d Brigade S-5 (Civic Action Section) Major Walter Burns. "We wanted to let the people know that it was their government, not the US Army, that was helping out. We just provided the food.

The Army is not through yet. More than 78,000 feet of lumber is being sent to the hamlet. The first loads have already arrived and villagers are beginning to rebuild.
PATROL BASE DIAMOND - Dawn's first light shows sweat, dirt and exhaustion engraved on their faces. Some try to sleep. Others stare blankly into the distance. A few talk. A deep weariness prevails over the sweet smell of gunpowder.

Four hours ago an estimated two battalions of North Vietnamese Regulars swept across the Cambodian border and buried themselves at the Fire Brigade's 2nd Battalion, 25th Infantry in this tiny patrol base on a dry open plain. The Wolfhounds fought for their lives, and now it shows.

The men of Alphas and Delta Companies killed 180 NVA regulars in a battle they will talk about for years and remember for a lifetime. Twenty five hours ago they dismantled Diamond I and moved it, gun, beam and sandbag to this new position, a job which would normally require three days.

Working swiftly against time the entire battalion carved a defensive position which had to hold. The enemy had attacked on the first night in the previous position and would likely attack again here.

At midnight, Patrol Base Diamond III was ready. Guards were posted and the infantrymen tried to rest.

It was the most intense mortar attack that I have ever experienced, twice as bad as the attacks on Diamond I and Diamond II, reported 1st Lieutenant James J. Sullivan, Chaton, N.J. Specialist Five Eino Honkala, Vancouver, Wash., added: "The shells really rained in. It sounded like automatic mortar."

Few were injured as an estimated 500 mortar shells exploded against the overhead cover constructed that afternoon.

A lull fell on the battlefield. The NVA had lifted the mortar attack to allow their assault troops to move. Earlier that evening, listening posts had been established, one to the west, one to the north, and one to the south. Wolfhounds at the western LP took advantage of the lull to break for the patrol base.

They made it. The post to the east suffered several casualties, while the post to the north held, that 400 RPG's struck around the base. Twice after time positions took direct hits, but none were knocked out.

The men, fighting outside their bunkers, kept the enemy from getting close enough to accurately fire their weapons.

Each bunker had an M-60 machinegun, and many had 90mm recoilless rifles. The Wolfhounds knew how to use them.

As the RPG's raised in,apper squad closed on the perimeter's defensive fire armed with Bangalore torpedoes and AK-47's in a desperate attempt to breach the line. Specialist Four William Baumgardner of Huntington, Pa., recalled: "They blew the wire to the front and right of my position. So we put a lot of fire in that direction. We were ready for them, and they never got inside."

Flare ships and night lighting aircraft circled above illuminating the scene as dust and debris rose from rounds impacting on both sides.

The beleaguered infantrymen
On April 5th and 6th in the second round of battle for the Diamond Patrol bases along the Angel's Wing, two companies of the 2d Battalion, 27th Infantry, Wolfhounds wrecked two battalions of the North Vietnamese Army, killing 117.

Shortly after 3 a.m. April 5, troops detected a small group of people 800 meters from the perimeter. Specialist 5, Harold T. Gillespie of Compton, Calif., said, "They were moving around in one location, and were apparently setting up a mortar position. Other detected groups moving around the base drew artillery fire.

Then, at 1:30 a.m., the enemy began mortaring a listening post 200 meters west of the base's wire. This fire was quickly shifted into the perimeter. "We got up to look around," said Specialist 4 Kenneth Brink of Laingsburg, Mich., "and the first thing I saw was a whole bunch of enemy soldiers running right at us. It reminded me of an end run going through my position in a football game."

The NVA had apparently been planning on using the cover in the listening post's site to place fire on the perimeter. "They were carrying a heavy weapon of some sort. We changed their plans when we opened up on them," said Specialist 4 Aligher Griffin of Rochester New York. "They started to carry away his bag dead just ten minutes after the attack started."

Another lieutenant said the biggest problem was the dust raised by the enemy mortars. He reported the Wolfhounds could hardly see the enemy advancing through the dust.

"From their vantage point, the Wolfhounds saw the enemy thunder at the perimeter in vain. None reached the wire, deadly rounds fired from leveled howitzers, devastating airstrike of pinpoint accuracy and fierce small arms fire saw to that."

Five a.m. found the enemy blasted by Wolfhounds and retreating from the coming dawn. "The battle was actually over before it got started," said Specialist 4 Aligher Griffin of Rochester New York. "The enemy was starting to carry away his dead within ten minutes after the attack started."

Another lieutenant said the biggest problem was the dust raised by the enemy mortars. He reported the Wolfhounds could hardly see the enemy advancing through the dust.

With the coming of full light, the Wolfhounds policed up the debris of their victory. Found were 81 Chi-Com grenades, 10 bazooka rounds, 14 tank rounds, and 21 AK assault rifles.

The enemy, normally scrupulous about taking his dead from the battlefield, had left behind 81 bodies in his flight.

On April 6th an even more abortive attempt was launched on Patrol base Diamond II. As artillery and gunships killed 36 NVA, they got no closer to the wire than 1,200 meters.

Huntington, Pa., recalled: "They blew the wire to the front and right of my position. So we put a lot of fire in that direction. We were ready for them, and they never got inside."

Flare ships and night-lighting aircraft circled above illuminating the scene as dust and debris rose from rounds impacting on both sides.

The beleaguered infantrymen were not alone here, last night. All the firepower the Tropic Lightning Division could throw was here in support. Artillery, gunships and air strikes broke the back of the advancing enemy as automatic weapons cut him down in front.

As the fight continued, eight gunships circled overhead constantly spitting their fire onto the plain below. The Air Force came in with jet air strikes on the staging area used by the enemy.

"The two 105mm howitzers from B Battery, 1st Battalion. Eighth Artillery fired an incredible 500 rounds and, during the height of the battle, lowered their tubes and fired point blank into the churning NVA."

The heavy fighting continued until the rising moon warned the NVA of the dawn. They broke contact and, leaving a few behind to continue the fire, retreated to their sanctuary across the border. The fighting subsided shortly after 6:30 a.m.

The gunships have returned to base, the guns are quiet. Patrol Base Diamond II is intact. The men have a right to be exhausted, they have fought hard. Victory does not come easily, or cheaply. Thirteen Americans lost their lives in the battle.

Soldiering is a profession, and you must be a professional. Know the tools of your trade—guns, explosives—and treat them with respect. Share your knowledge with those you work with, and don't be afraid to ask questions of them. Remember that the next mistake you make could be your last.
New Port Richey, Fla.

"It was complete with aiming stakes," added Specialist 4 James Howard of Daytona Beach, Fla. "We continued searching the area and found a rocket launching position." THE "MOD SQUAD," as it is called, decided to play the trick on Charlie.

"We reported the positions to our commanding officer," said squad leader Sergeant Darrell Walden of Girard, Ill., "then instead of destroying the positions only to have Charlie rebuild them again, we moved all of the aiming stakes without disturbing the area."

That night, sure enough, Charlie began to fire but none of the rounds landed near the Tropical Lightning positions.

In fact the rounds fell outside the perimeter into uninhabited areas surrounding the base.

The first rockets fired went over the perimeter.

"We couldn't move the rocket firing positions so we elevated the stakes," said Specialist 4 Mike Aguilar of Lockhart, Texas, "This caused the rounds to pass over the base."

The ENEMY evidently realized something was wrong and began adapting.

When the rounds began falling closer, eight-inch guns from D Battery, 2d Battalion, 1st Artillery opened up on the enemy positions and silenced them.

**CU CHI** — Ever imagine a theatre of the underground in Viet Nam? You say you doubt the Army would furnish the type of entertainment you watched back in the world, in Greenwich Village or Haight-Ashbury? Mechanized infantrymen of the 1st Battalion (Mechanized), 5th Infantry have possibly one of the most formidable of underground theatres.

At Fire Support Base Patton, the infantrymen decided they needed an occasional break from chasing Charlie. With the encouragement of Lieutenant Colonel William E. Klein, battalion commander, the troops began to dig.

In one week a large hole altered the landscape of Patton. Timbers, portable steel paving, and sandbags formed a roof sturdy enough to resist rocket and mortar attacks. In no time the underground theatre moved from an idea to a reality.

Each night infantrymen can see such favorites as "Casino Royale", "Hang 'em High", "Return of the Seven".

Sergeant Anthony Pappalardo of Bronx, N.Y., commented, "I'm afraid we'll all be engrossed in a mystery some night and turn around to find the Viet Cong watching, too. Of course, guards are always rotated so we need not fear."

FSB Patton's underground theatre may not be advancing new art forms but it provides a very important function. It relaxes the infantryman and allows some of his tensions to drain off.
