
1. (U) This report is submitted in accordance with ARESM 55-2/3 AROGp Suppl 1, dated 15 June 1967.

2. (S) Jolly Greens 16(L) and 37(H) were launched at 0840Z and proceeded to the initial position of two F-4s (Hanger) pilots given as 075/76/89. Shortly after take-off, both aircraft were directed to hold at the border on the 060° radial. Bingo time was given as 1215Z. While en route a revised position of 060/80/89 was given; this was subsequently revised to 060/78/89 (180°7'N, 105°56'E) which was the actual location of the recovery. Both Jolly Greens, escorted by Sandys 7 and 8 established orbit as directed until moved to a position directly over the survivors. Meanwhile, Sandy 5, the lead aircraft, had gone below the cloud cover and was conducting a search.

At 1005Z Jolly Green 16 was cleared to begin a descent, and advised that the weather was generally 2000 feet overcast with 3 miles visibility. By 1010Z Jolly Green 16 was clear of the clouds and established immediate visual contact with Sandy 5. Because of weather conditions and terrain interference, some difficulty was encountered in pinpointing the survivors. At 1012Z the parachute of the first pilot was sighted. Hanger 14 advised that he was not in his chute, but approximately 75 yards away. He ignited a smoke flare to pinpoint his position and Jolly Green 16 immediately established a hover above his position. He was on board within 5 minutes and Jolly Green 16 proceeded to the location of Hanger 18, which had been approximately marked by Sandy 5 using a smoke rocket. The position was quickly sighted and Jolly Green 16 established a hover over the survivor who was still hanging in his parachute. At this time it became necessary to use both search and flood lights. The penetrator was lowered to the survivor and, after 5 minutes, it was apparent that he was having difficulty. The rescue crew commander elected to send the pararescue specialist down to assist him. After some difficulty caused by darkness and the denseness of the jungle, the survivor and the pararescueman were hoisted on board. During the recovery of Hanger 14, Jolly Green 16 did not encounter any hostile action; however, Sandy 5 reported that during the recovery of Hanger 18 an enemy ground party was sighted approximately one half mile away, moving toward the survivor.

After the recovery of the second survivor, Jolly Green 16 and Sandy 5 departed the area and joined Sandy 6, landing at 1210Z. Radio discipline during the entire mission was good.

3. (S) The names of the survivors were: Charles Lewis, AFSN Unknown, Major, USAF, and Jack Kelly, AFSN Unknown, First Lieutenant, USAF, 148th TFS, Dallas. Classified by: SUBJ TO GENERAL DECLASSIFICATION SCROLL SCHEDULE OF EXECUTIVE ORDER 11846

1-370-8-68-11 AUTOMATICALLY DOWNGRADED AT TWO YEAR INTERVALS

ROBERT D. GREER, Capt, USAF
Rescue Crew Commander
Mission Narrative 2-3-68
16 January 1968

Mayday heard from Hangar flight at 0830Z, said they were ejecting. Cricket gave their position as 060/87, CH89-1 beeper was heard after ejection.

Crown 2 initiated SAR immediately, then Compress advise that Crown 5 would handle the SAR as Crown 2 was to be held for another possible mission. Crown 5 had negative contact with Compress, tankers, Jollie Greens or the Sandys. Crown 5 suggested Crown 2 remain in command. Queen and Crown 2 agreed. King said Crown 5 will take command. Crown 5 obtained information from Crown 2 as to what resources had been deployed and requested Jolly Green 16 and 37 plus Sandys were being scrambled from CH 89. H1 performance aircraft available were- Osack, Scuba, "unfighter, Dallas, How, Hammer, Bear and Bison

Jolly Greens 16 and 37 airborne out of CH89 along with the Sandy 5, 6, 7, 8 approximately 0850Z. Border clearance requested from Compress at this time. Crown 5 was attempting contact with Scuba flight who was enroute to scene, but unable due to poor communications had intermittent contact. At 0905Z Scuba reported he had contact with Hangar 2 on the ground.

Jolly 16 and 37 directed by Compress to orbit at the border along with Sandy 7/8 - Sandy 5 & 6 to proceed to scene and attempt contact and check on the weather. A recheck with Compress on border clearance for Jolly revealed still no clearance. Sandy 5 arrived on scene and made voice contact with Hangar 2A the weather in the area described by the downed man on Sandy 5 was bases 1000 thick layer and 3500 feet layers. Visibility approximately 3 miles. Sandy 5 could not pinpoint Hangar 2A so elected to descend thru bottom layer and attempt to establish visual contact with downed man.

At 0925Z Compress directed Sandy 1, 2, 3, 4, to scene. Sandy 5 still had much difficulty trying to locate man on the ground. Compress wanted to know from Sandy 5 if SAR feasible-Sandy 5 recommended Jollies be brought in. At 1020Z border clearance obtained and Jollies inbound. Arrived scene approximately 1030Z, Jolly 16 descended and aided Sandy 5 in locating Hangar 2A-pickup made at 1053Z. Sandy 5 finally located other man, he was still in his harness, RV was deployed and with Jolly16 lights on pickup was made at 1115Z. Darkness was closing in which made locating second man hard.

At 1105Z Sandy 1, 2, 3, 4 were told to pull electronic search before RTB. All other forces RTB, with J 16 & 37 taking survivors to CH 89- Jolly 16 reported survivors in pretty good shape.

At 1332Z beeper and voice contact made by Sandy 1, 2, 3, 4, with Hangar 1AAB were advised SAR forces would be back at first light to get them as it was too dark to attempt it then.

TO: 1-37C
3rd ARRGo (JSARC)
3 May 1971
IN TURN
(20) 28 Jan 1968

1. (U) This report is submitted in accordance with ARBSM 55-2/3ARRGo Sup1, dated 15 June 1967.

2. (S) On 16 Jan 68 two ELG crews (Hangar 1 and 2) ejected near Ma Cia Pass, North Vietnam. Hanger 2's crew was rescued the same day. Darkness and a low overcast prevented the recovery of either Hanger 1 pilots. On 17 January two efforts were made to recover Hanger 1 but weather precluded a recovery. Both survivors indicated they had an approximate 2000 foot cloud base over their position (the tops of this cloud layer were 5000-6000 feet MSL). Sandy 5 penetrated the overcast to conduct a visual search. His last radio transmission stated he had broken out below the overcast over a river, a road and a populated area; he said the tops of the surrounding terrain were in the clouds and he could not hear Hanger 1 on UHF Guard. Hanger 1 said he then heard a large number of hostile weapons open fire, and this was the last he heard from Sandy 5. Sandy 6 penetrated to look for Sandy 5 and Hanger 1 but was unsuccessful and recommended that further SAR efforts wait for more favorable weather.

3. (S) On 18 Jan 68 Jolly Green 09(L) and 37(E) were scrambled at 06h32Z and proceeded to an orbit point of 070/6589. The survivor's position was given as 062/8289 (17°958'N, 105°55'E). Sandy's 5A and 6 flew directly to the area, while Sandy's 7 and 8 escorted the Jolly Greens. Arrival time in orbit was 1230Z. Sandy's 5A and 6 were getting considerable antiaircraft and automatic weapons fire from gun positions to the north, east and west of the survivors. Misty 21 aided them in directing high performance strikes of Gunfighter, Maverick, Schliitzi, and Roman flights. At 062/82 Sandy 5A called in Jolly Green 09 escorted by Sandy's 7 and 8. Jolly Green 37 remained at the orbit point. Once in the area, Jolly Green 09 flew to an unpopulated and heavily wooded area about one mile south of the survivor at three-top level, putting a ridge between the helicopter and the hostile weapons. At this time a 50 caliber machine gun site fired on Sandy 5A from a hill overlooking the survivor. He expended all his resources, used all of Sandy 6's resources, called in several high performance aircraft and finally used Sandy 7 and 8 before the weapon was silenced. At 0700Z Sandy 5A called in Jolly Green 09 for the pickup. Hanger 1A's chute was not visible, and Jolly Green 09 requested a flare to identify his position. The flight engineer and pararescue specialist spotted the smoke and vectored the helicopter in over it. Due to the high trees, steep slope, dense jungle understory, and confusion of smoke the survivor himself was not visible. Another smoke flare was requested. The flight engineer requested that the helicopter turn 180° and he directed it over the second flare, spotted the survivor, and lowered the penetrator. As the survivor indicated he was ready to be hoisted, the
pararescue specialist saw ground fire coming from the left side of the helicopter. Using the M-60 machine gun, one belt of ammunition (250 rounds) was sufficient to suppress the fire. With Hanger 1A on board, a hovering low level search was made to locate Hanger 1B. Radio contact with this pilot had been lost earlier that morning and when no smoke, voice or visual contact was made after approximately 5 minutes of low level search, Sandy 5A recommended all SAR forces leave the area. Jolly Green 09 and a Sandy aircraft departed the area at 0720Z, rejoined with Jolly Green 37 and returned to Channel 89, landing at 0820Z. Sandy 6 received battle damage of suspected 12.5mm variety in the mid-fuselage section. Radio discipline was better than average with Crown 4 doing an excellent job. However, the SAR effort on Preview 01 was definitely overloading UHF Guard, and HF frequencies.

4. (U) The name of the survivor was: Scott B. Stovin, Captain, Da Nang.

5. (U) Crewmembers of the Jolly Greens were:

HENRY C. CONANT, Capt, USAF
Rescue Crew Commander
Mission Narrative 2-3-68

17 January 1968

On an RTB Crown one assumed station for Crown five due to engine failure. At 0740Z Gricked Control advised that the weather in the area of downed crew of Hangar 1 was clearing and it was clear enough to attempt a rescue.

At 0755Z Jolly Green 03 and 27, Sandys 5A, 5B, 5C were scrambled. Sandys 5A and 6 were given border clearance while Sandy 7, Jolly Reans 03, 37 were held at the border, awaiting the recommendation of Sandy 5A to proceed to the scene.

Sandy 5A recommended we have some high performance aircraft for flak suppression. Gunfighter flight was scrambled along with Locust and Hudson flights were vectored to the area. Sandy 5A advised that the immediate area of Hangar 1 was still overcast with no means of getting beneath the overcast. Hangar 1 Bravo was contacted and he said he was surrounded by enemy and it was overcast in his position. Sandy 5A recommended we RTB our forces until the weather cleared. They were RTB at 0905Z. While in the area Sandy 5A and 6 conducted an electronic search in the area for Sandy 5 with negative results.

On 17 Jan, Crow 4 resumed the SAR effort for Hangar 1, an aircraft down on the previous day with two POB. The location of the SAR was approximately 068/81 from channel 89.

Because the weather in the area was overcast, the SAR did not begin until 1000H. At this time, Misty 11 was over the scene and established voice communication with both survivors. When Misty 11 arrived on scene, he reported the weather overcast with one large break in the clouds, One survivor estimated the ceiling in his area at 2-4 thousand feet.

Sandy 5 and 6 arrived on scene at 1030H. After numerous communications with the survivors which were relayed by Misty 11 because the Sundays were not receiving, Sandy 5 said that the area was workable. Jolly Green 09 and 37 were then cleared across the border with Sandy 7 and 8 as escort.

At 1110H, Torpedo 3 flight arrived on scene and provided communications in place of Misty 11. During this time, Sandy 5 and 6 were working to pinpoint the survivors and to get below the clouds.

Sandy 6 reported seeing Sandy 5 working below the clouds. Sometime between 1100 and 1130 Sandy 5 made his last radio contact with the rest of the SAR forces. Because he had been having some difficulty receiving and transmitting because of his low altitude and possibly his equipment, the rest of the SAR forces were not concerned by the lack of communication until 10-15 minutes after Sandy 5 was last heard. Repeated attempts to raise Sandy 5 on all SAR frequencies were unsuccessful. Sandy 6 said that the last time he saw Sandy 5 was at grid 900 750 or about the 067/74 mi OSH9.

At 1215 the weather in the area began to deteriorate and the SAR forces were given an RIB. Gunfighter flight which had just arrived on scene conducted an electronic search for Sandy 5 until 1230H. He also advised the survivors from Hangar 1 that the SAR would be resumed later.

Note: Hangar 1 Alpha, the front seater, correctly answered his personnel authenticators. Hangar 1 Brave was not asked the questions.

John T. May, Capt, USAF
Rescue Crew Commander
Mission Narrative 2-3-68

During the morning of 18 Jan, constant weather recon was kept in the Hangar 1 SAR scene, the 062/82 miles from channel 89. Until 1200, the scene was overcast. At 1200, Vespa flight reported breaks in the overcast. Shortly there after, Misty 21 reported that one survivor had his in sight and he recommended that the SAR forces be launched.

The SAR forces were launched at 1250. Jolly Green 09 and 37, and Sandy 5A,6,7 and 8 departed channel 89. They arrived at the border at 1330. Sandy 5A and 6 continued into the SAR area. Sandy 5A and Misty 21 spotted the chutes of both survivors and had communications with both of them. The survivors correctly authenticated their personal authenticators. All SAR forces were cleared across the border.

At approximately 1400, Sandy 5A began to receive ground fire from a 37mm position on a hill. Before the SAR force moved into the area of the survivors, Sandy 5A directed strikes against the gun position. He used Gunfighter 1,2,3, and 4; Schlitz; and Maverick flights. Misty 21 also made strafing passes.

At 1445 the SAR forces moved in. Hangar 1 Alphas was picked up by Jolly Green 09 at 1510 at WB9783. Attempts to contact Bravo to have him release smoke were unsuccessful. Sandy 5A reported that a communication from Hangar Braves was received in which Bravo stated that unfriendlies were within 20 meters of his position and that he was destroying his radio. Because of the ground fire in the area(Sandy 6 was hit at 1505) the SAR forces pulled out. Misty 21 continued efforts to contact Bravo with negative results.

Pacific Stars and Stripes information for 37 ARRS

For date 680122

37 ARRS was a US Air Force unit
Primary service involved, US Air Force
Quang Nam Province, I Corps, South Vietnam
Location, Da Nang

Description: Monday 22Jan68-3 Pilots Saved in Daring Rescues Over N. Viet SAIGON (UPI). For Maj. Charles E. Lewis, of Dennison, Texas and 1st Lt. Jack L. Kelly, 27, of Pawnee, Okla., it was a short wait after being downed over North Vietnam before being rescued. But for Capt. Scott B. Stovin, 29, of Milwaukee, Wis., it was a long wait. The three were aboard two F4 Phantom jets downed by unknown causes over the Southern Panhandle of North Vietnam earlier this week. "I didn't think they'd make it to us in time," said Lewis. "There was heavy overcast when we went down and it was getting late. We had to wait just a little more than an hour before they found us." The helicopter rescue of Lewis was swift and without complications. But his fellow pilot was hanging in a tree, unable to free himself of the parachute harness. Sgt. Peter S. Harding, 21, of Foxboro, Mass., was lowered from the hovering chopper, 45 miles west northwest of Dong Hoi to cut Kelly loose. The pilot of the Jolly Green Giant helicopter, Capt. Robert S. Greer, 35, Enid, Okla., said, "both of the pilots were downed in dense jungle. We were lucky there were both on a ridge-like section of a hill." The other pilot wasn't found so quickly. The following day the helicopters, and the planes that fly cover for them, "Sandys," were back scouting the panhandle for him and his copilot. The copilot still is missing but probably dead or captured. It wasn’t until the third day they found the third man, in hazardous terrain, 60 miles northwest of Dong Hoi. The lead Sandy pilot, Col. Ralph S. Hoggart, 43, Mount Pleasant, Penn., made a pass over Stovin. Automatic weapons fire opened up on his propeller driven ship. "The gun emplacement fired a little early and gave away its position before it could cause the mission real trouble," said Capt. Donald Miles, 28, Cleburne, Tex., a second Sandy pilot. When the guns were silenced, the Jolly Green Giants moved in. The jungle penetrator was lowered by S. Sgt. Don E. Cole, 29, Union City, Tenn., as Capt. Henry C. Conant, 27, Luckey, Okla., held the chopper over Stovin’s position. "The undergrowth was heavy and there was elephant grass all around," said Sgt. Patrick F. Allaire, 21, Mason, Mich. When Stovin was hoisted up, the North Vietnamese opened up on the chopper. "I was looking out the door when I saw a tracer passing right over us," the pararescue man said, "I also saw a couple of puffs of smoke coming from what I took to be a gunner’s position and I opened up on it. I don’t know if I hit him or just scared him, but we didn’t get any more fire from that direction."

Comments: MAJ Lewis, Charles E.; jet pilot; 1LT Kelley, Jack L.; jet pilot; CPT Stovin, Scott B.; jet pilot; SGT Harding, Peter S.; pararescue; CPT Greer, Robert S.; pilot; COL Hoggart, Ralph S.; Sandy pilot; CPT Miles, Donald; Sandy pilot; SSG Cole, Don E.; pararescue; CPT Conant, Henry C.; pilot; SGT Allaire, Patrick F.; gunner.
