Dear Dorth-

I am starting this at noon, because I don't know if I will have time to write tonight. The conference got started this morning in good shape, and has rolled-along smoothly up until now, but it promises to drag on until late tonight.

The lights are now completely out in the 302. The city power is still out and now the generator has broken down. As usual, nobody gives a damn and corrective measures are proceeding at a desultory pace. I don't expect to see any more hot water until I get home.

Your last letter indicates you would like to come to the Med next summer. I think that's a No. 1 idea. It suits me.
we might pack Tom and Stuart with the DeSallees, and you could much about all our. Then when the ship came to a French port, they could hop on a train and come down.

You are wrong about my knowing the Summer's schedule. I don't. I suppose I infer from your letter that Beaumar has written to me. By no I have not received it. If you do plan to come to the Music, perhaps we should try to buy our seats there. They rather than now and just let it sit all next summer.

Lum.

P.S. I agree with your idea on renting small place in Mayport if we are to be there only Oct 5-12. For continuity, however, I'd find it best to put in for quarters,
for if we go for even a short period, we aren't likely to find anything as cheap as quarters for $50 a month including utilities. At that price, we could, if need be, let our house stand vacant, attaining that in itself has some disadvantages in addition to the money. Anyhow, let's look into it. Quarters can be had furnished for same price!
