Dear Dorothy,

Your letter of last Friday with Tony's enclosed came today. I wrote to him at camp. I wanted to send him something in it, but didn't have anything. Would have sent him some little spending money, but we have to use scrip here and I don't have any real money. I'll well.

Enclosed is picture of one with a mine which was recovered from Cua Viet river. You might call Jack Duggan and ask if he knows it. I'm sure he knows the history of these things. It's not a very good picture, but it is clear enough. (I didn't take it.)

The ARVN seem to be making good progress in rooting out the VC in the NE section of town. They had quite a fight a couple miles E of here last night and killed a whole batch of them. We could see the junks and choppers going at it late.
last night. But basically it seems the PNG Rangers were doing the business - with hand grenades.

Went home at noon today and played some of the tape I made last night. It sounds very good. I am going to try to pick up a couple of small speakers (under $10) to use for extension to the thing, but I must say, the ones that are in it sound quite good.

Two of us went down to Cholon in the afternoon and took a bunch of pictures of the damage there. It was really terrible. The guy who said this wasn't as bad as the fighting just hadn't been around. It's much worse. There are about 8 squam block down there which are completely devastated - and numerous individual buildings outside of that. It's really a shame - lots of them were nice old buildings - 19th century French - like New Orleans.

Love,

Jen
