**CONFIDENTIAL**
CHRONOLOGY OF SIGNIFICANT EVENTS

1 - SEAL Team conducts ambush near Tac Ba River. One VC killed and one sampan destroyed. p. 14.

2 - Coastal Groups 34/37 base attacked by Viet Cong. One friendly was killed and five were wounded. Two Viet Cong were killed. p. 34.

3 - PBRs were in two firefights with Viet Cong 17 miles east of Sa Dec on the Mekong River. One enemy light machine gun position was destroyed resulting in a secondary explosion. p. 7.

5-6 - Coastal Group 15 and two U.S. Marine companies killed five Viet Cong and captured three. One mine booby trap and two tunnels were destroyed. p. 33.

7 - USCGC POINT GRAY detected French steel hull vessel dead in the water in a concentration of junk. p. 16.

8 - PBRs captured sampan with 300 pounds of rice on the Bassac River. p. 4.

9 - Three PCFs arrived aboard USS COMSTOCK ( LSD 19). p. 22.

11 - PBRs came under automatic weapons fire on the Co Chien River. One U.S. crewmember killed. p. 5.

16 - PBRs captured one Viet Cong on Mekong River. p. 4.

17 - PCFs provided illumination in support of a SAR effort after two F4Cs collided 20 miles south of Nha Trang. One survivor was recovered. p. 19.

20 - PBRs on the Soirap River captured one Viet Cong, one sampan, one rifle and personal papers. p. 10.

22 - MSB 15 hit by rocket projectile in an ambush by the Viet Cong on the Long Tau River. One U.S. crewmember killed and nine wounded. p. 11.

24 - PBRs on the Bassac River had firefight with Viet Cong fleeing from Regional Force operation. One Viet Cong killed and one rifle captured. p. 5.
Augmented by the arrival of five additional PBRs, Operation GAME WARDEN continued successfully in its mission of population and resources control on the waterways of the Mekong Delta and the Rung Sat Special Zone. A meaningful indicator of the effectiveness of GAME WARDEN was the relatively sophisticated Viet Cong psychological warfare campaign launched against the PBRs. Increasing GAME WARDEN civic action projects and humanitarian efforts have been effective in pointing out the enemy fabrications to the populace. In addition, a PsyOps campaign in support of the upcoming revised rules of engagement - permitting patrol units to engage evading contacts after all attempts to bring them alongside for inspection have failed - was concluded.

During September PBRs provided increasing support for Vietnamese outposts under attack in their patrol areas, and provided medical evacuation of indigenous personnel. These efforts continued to impress the Vietnamese and U.S. Advisors in the area. PBR support operations in connection with heavy floods in the Upper Mekong Delta enhanced this feeling.

Despite the first major GAME WARDEN personnel casualties, progress continued toward the accomplishment of assigned missions.

DELT A RIVER PATROL GROUP

Interdiction of Viet Cong Movements

On 31 August at 1855, PBRs 31, 35 and 40 were proceeding downstream on the Bassac River 12 miles southwest of Can Tho when

1 CTG 116.1 msg 031206Z Oct 66
CONFIDENTIAL

A sampan with two men aboard was observed crossing from Phong Nam Island to the south bank. As the patrol closed, the sampan attempted to evade and warning shots were fired. Enemy fire was immediately received from the bank, and in the ensuing firefight the sampan was destroyed. Artillery from the Tra On Battery was then called in on the enemy positions. There were no friendly casualties.

On 8 September at 1445, PBRs 30, 34 and 36, operating in support of an ARVN Ninth Division operation 11 miles southeast of Can Tho, observed a sampan departing a canal in the vicinity of the operation. The two occupants of the sampan jumped overboard as the PBRs closed and fired warning shots. The sampan was captured and was found to contain 300 pounds of rice. The two occupants escaped.

One Viet Cong was captured the night of 16 September when at 1933 PBRs 98 and 103 illuminated a sampan moving from Thoi Son Island to Kien Hoa across the Mekong River four miles west of My Tho. As the patrol closed, five rounds of sniper fire were received from the bank, and the occupants abandoned the sampan. One occupant escaped but the second, discouraged by a concussion grenade thrown beyond him, took the life line and surrendered. He was unharmed, and admitted to being a Viet Cong guerrilla. One of his tasks was warning of the approach of PBR patrols by pounding together two coconut halves three times.

PBRs impeded a possible Viet Cong crossing the night of 25 September when at 2220 PBRs 113 and 117 received light rifle and grenade fire 24 miles southeast of Ving Long on the Co Chien
CONFIDENTIAL

River. A subsequent rendezvous with two civilian junks indicated that the Viet Cong had closed that area of the river, possibly in preparation for a major river crossing. The PBRs remained on patrol in the area and at 2109 were involved in another firefight. The Viet Cong possibly utilized a large caliber weapon, but there was no damage to the patrol units.

Viet Cong Harassment of Patrol Units

Continued attacks by Viet Cong forces using fortified shore positions resulted in the first PBR crewmember killed in action since the inception of GAME WARDEN operations. On 11 September at 1915, PBRs 29 and 82 came under automatic weapons fire on the Co Chien River 26 miles southeast of Vinh Long. In the ensuing firefight one PBR forward gunner was killed. Enemy casualties were unknown.

On 24 September from 0720 to 0815, PBRs 38 and 40 came under small arms and automatic weapons fire in the area just south of Can Tho on the Bassac River. Aircraft from Phong Dinh Sector were called in for support. The aircraft reported there was a Regional Force operation in progress, and the Viet Cong had been forced to the river bank. Four PBRs were stationed in the area for support. Friendly troops sweeping the area later reported one Viet Cong killed as a result of PBR fire. A rifle was alongside the body.

The Viet Cong continued extensive psychological operations against the PBRs during September. The Tan Chau District Chief reported the Viet Cong were telling the populace that PBR personnel would rape, kill and steal whenever they stopped boats. The effec-
CONFIDENTIAL

tiveness of this was confirmed when one Sa Dec patrol stopped a
boat containing young girls, several of whom went into hysteric
as the patrol approached. It appeared that the Viet Cong PsyOps
effort had spread to the northern areas of the Mekong Delta.

Efforts were also continued to draw PBR patrols into possible
ambushes or booby traps. On 9 September at 0351, PBRs 96 and 110
sighted what appeared to be an empty sampan moored approximately
150 yards from the bank in the area just east of Ving Long on the V
Co Chien River. Suspecting a booby trap, the patrol fired warning
shots and then M-79 grenades in an attempt to dislodge the craft.
Fire was then received from the bank, and the patrol cleared the
area. Subsequent reconnaissance indicated the sampan had been
removed. As the sampan had been placed in the vicinity of a
friendly outpost, it was evaluated as an attempt by the Viet Cong
to draw fire into the outpost. The enemy fire was not returned.

These significant incidents also occurred during the month:

2 - At 1945 PBRs 30, 31 and 40 received small arms fire
eight miles southeast of Can Tho on the Bassac River.
This is the first instance of enemy fire immediately
upstream from Tra On in an area where the Viet Cong
have informed the populace they are going to "get a PBR."

3 - Between 1935 and 2155, PBRs 82 and 117 received heavy
automatic weapons fire 17 miles east of Sa Dec on the
Mekong River. The fire was returned, and artillery
from the My Cay Battery was called in on the ambush
positions. PBR 117 sustained three minor hits. There
were no friendly personnel casualties.
3 - At 2308, subsequent to the previous action, the same
patrol again came under attack, this time receiving one
round of recoiless rifle fire. During the firefight
an enemy light machine gun position was destroyed with
a moderate secondary explosion resulting. Artillery
was again called in on the ambush position.

10 - At 1950, PBRs 35 and 38 received enemy grenades and
small arms fire five miles southeast of Can Tho, a
populated area. The fire was returned with care. As
it was election eve, the action was evaluated as an
attempt to draw PBR fire into the populated area. At
2005, PBRs 39 and 41 experienced a similar incident in
the same area, coming under fire from three positions.
Fire was returned at only one of the positions.

25 - At 2020, PBRs 105 and 109 received heavy machine gun
fire in the vicinity of My Tho while investigating
curfew-violating sampans. After the firefight four
sampans were rounded up. The occupants stated that they
had been forced by the Viet Cong to fish after curfew;
and it appeared that the Viet Cong were using innocent
fishermen to lure the PBRs into an ambush.

30 - PBRs 31, 39 and 41 accounted for one Viet Cong killed
when they received light enemy fire six miles southeast
of Can Tho. A later reconnaissance revealed one sniper
hanging from the tree where he had been shot.
PBR Assistance.

On three occasions during September GAME WARDEN patrol units in the Mekong Delta came to the assistance of friendly outposts under attack. At 2315 on 5 September, PBRs 79 and 80, at the request of Sa Dec District Headquarters, proceeded to assist a Popular Force outpost under attack 12 miles northwest of Sa Dec on the Mekong River. Upon arrival the patrol observed that both flanks of the outpost were under heavy enemy fire. The patrol assisted in taking the positions under fire, and drew enemy fire in return. Upon arrival of a flare aircraft the Viet Cong broke contact. There were no U.S. casualties, but one Popular Force soldier was killed, two were wounded and two dependents were wounded. The PBRs provided medical evacuation of the wounded to Sa Dec.

On 7 September at 2125, PBRs 31 and 35 observed a prearranged flare signal indicating assistance was desired in the vicinity of a friendly outpost 10 miles southeast of Can Tho on the Bassac River. The outpost pinpointed Viet Cong positions by using tracer fire and the PBRs took them under fire. There were no friendly casualties during the action, and enemy casualties were unknown. There had been a significant, recent buildup of Viet Cong forces in the area.

In the same area on 11 September at 0010, the Viet Cong commenced a mortar attack on an outpost and directed automatic weapons fire at a PBR patrol. The PBRs took both the mortar and automatic weapons positions under fire. The automatic weapons
CONFIDENTIAL

position was silenced and one secondary explosion noted. The Viet Cong then shifted their mortar fire to the PBRs. Six rounds were fired with no damage to the boats before the mortar was silenced at 0030. The patrol returned later for possible medical evacuation, but upon arrival at the outpost discovered there were no casualties. VIN River Assault Group units from Con Tho were then dispatched for outpost security.

In addition to the above actions, the PBRs provided medical evacuation for injured civilian and military personnel on several occasions.

9 - At 1845, PBRs 134 and 135 were notified by the U.S. Special Forces detachment at Tan Chau that a Vietnamese girl had been critically injured by a water buffalo in a village on the Mekong River near the Cambodian border. The girl was carried to the Special Forces detachment at Chau Doc where she was treated and transferred by a Vietnamese Air Force helicopter to the Australian Surgical Team Hospital at Long Xuyen. The prompt action was credited with saving her life.

- At 2215, PBRs 52 and 115, also operating on the Mekong River near the Cambodian border, received word from the USSF detachment at An Phu that a Regional Force soldier was critically wounded. He was carried by PBR to a Vietnamese hospital at Chau Doc.

10 - At 1145, PBRs 39 and 41 conducted medical evacuation for two civilians who had been wounded as a result of
CONFLICT

...ARVN operation 12 miles southeast of Can Tho. They were transferred to Can Tho.

11 - At 1040, a wounded ARVN soldier was evacuated from Tra On to Can Tho.

25 - At 1230 two wounded Vietnamese Special Forces irregulars were evacuated by PBR to Long Xuyen. The PBRs were utilized due to flooding of the base helicopter pad.

28 - At 1230, PBRs 39 and 41 inspected a sampan, noting one child with third degree burns thought to be the result of a napalm strike. The patrol transferred the child to Can Tho.

RUNG SAT SPECIAL ZONE RIVER PATROL GROUP

PBRs operating on the waters of the Rung Sat Special Zone had their most successful action of the month on the night of 20 September when a drifting Soirap River patrol detected a radar contact seven miles south of Nha Be. The patrol closed to 25 yards for visual observation, and the three occupants jumped overboard. The patrol launched two concussion grenades and four fragmentation grenades and forced the three suspects to the surface. As the patrol illuminated them, automatic weapons fire was received from the west bank of the river. During the ensuing firefight two occupants of the sampan escaped while the remaining occupant was captured. The sampan, containing a rifle and personal gear, was also captured and taken to Nha Be.

At 1245 on 15 September, PBRs 25 and 26, on a normal patrol in the same area of the Soirap River, observed an explosion in
the water approximately 25 yards astern of the cover boat. There was no river traffic or visible movement in the area and the action was evaluated as Viet Cong harassment by rifle grenade. On 24 September at 2345, a PBR patrol received heavy automatic weapons fire in the same location. This area of the Soiran River is a known Viet Cong crossing point.

Harassment of River Traffic

Having inflicted damage on minesweepers and commercial shipping in August, the Viet Cong continued to direct attacks against friendly river movement during September. The attacks were concentrated on U.S. Navy MSBs in an attempt to disrupt minesweeping efforts.

On 22 September at 1518, MSBs 14 and 15 were making their third pass of the Long Tau River when MSB 15 experienced an explosion on the forward starboard side at the turbine stack and MSB 14 observed three explosions within 50 feet of its position (see chart). At the time of the attack MSB 15 was approximately 30 meters from the west bank of the river and MSB 14 was approximately 12 meters from the east bank. It was low tide and slack water. Light trails of smoke were observed behind the projectiles used in the initial attack, and they were evaluated as rockets. Following the initial attack heavy automatic weapons fire was received from both banks, and the MSBs returned the fire until 1525 when they were clear of the ambush area.

In the ambush one crewmember of MSB 15 was killed and nine were wounded (MSB 15 was carrying a second crew for indoctrination),
and the boat sustained moderate material damage. Even though the area of the ambush was defoliated, there was dense underbrush which at low tide provided ample cover for this type of attack. At high tide the HSBs are able to observe the entire defoliated area.

One mining attempt was reported during the month. On 8 September at 0517, HSB 49 reported an underwater explosion while on a routine chain drag of the Long Tau River. Later that same day HSB 14 lost its "O" type moored sweep gear and received enemy small arms fire while effecting recovery. A PBR patrol in the area covered the HSB until the gear was recovered. In a third incident on 8 September, SS EXHIBITOR, a civilian cargo ship, received enemy harassing fire from the west bank of the Long Tau River. A PBR patrol arrived to assist and directed M-79 grenades into the enemy positions. There were no friendly personnel or material casualties in any of these incidents.

The final incident of the month occurred on the Dong Nai River east of Saigon at 0930 on 27 September when HSB 52, accompanied by HSB 49, experienced a heavy explosion close astern while sweeping northward. The explosion was evaluated by the sweep officer as a recoilless rifle or mortar round. There were no casualties. The previous day HSB 17 had observed and destroyed with M-79 grenades a bundle of bamboo secured with red flags in the same area of the river. The float was evaluated as a possible mine marker, and the proximity of the two incidents indicated a concerted Viet Cong effort to interfere with sweep operations in this area.
Helicopter Fire Teams

Navy-manned helicopter fire teams, operating from the GAME WARDEN base at Nha Be, and from USS TORTUGA (LSD 26) and USS COMSTOCK (LSD 19), supported friendly forces in the Rung Sat Special Zone throughout the month.

6 - At 1828 the U.S. advisor at Quang Xuyen reported that a Popular Force outpost was receiving enemy fire (see chart for positions). At 1845 the Nha Be fire team arrived and suppressed the fire.

7 - At 1920 the Nha Be fire team scrambled to support a U.S. Army helicopter which had been downed by enemy fire in the III Corps Tactical Zone adjacent to the RSSZ.

- At 1945 the TORTUGA fire team responded to a request from VNN authorities at Nha Be to assist in suppressing an attack on Dong Hoa Village. Upon arrival of the fire team the enemy broke contact.

8 - At 0150 VNN authorities at Nha Be reported an outpost under attack. The Nha Be fire team was airborne at 0155, and upon arrival attacked suspected enemy positions. The Viet Cong then broke contact.

- At 0430 a U.S. advisor reported a Regional Force platoon under attack near Can Gio and a fire team was dispatched to conduct air strikes on suspected enemy positions. The fire team subsequently provided medical evacuation from Can Gio for a seriously wounded soldier; then
rearmed and returned to the area to support a reaction operation.

30 - At 1117 a U.S. Air Force F-100 aircraft on a strike mission in conjunction with Operation BATON ROUGE crashed, but the pilot bailed out and was observed by personnel at Nha Be. GAME WARDEN helos provided fire cover and rescued the pilot.

SEAL TEAM

On 1 September at approximately 2100 in the vicinity of the branches of the Tac Be River (see chart), the SEAL Team conducted their first successful ambush of the month. A sampan, camouflaged with weeds and brush interwoven in a wire mesh, was observed moving through restricted waters. The craft was taken under fire and the one occupant killed. The sampan sank before it could be recovered.

The SEAL Team recorded its second successful ambush of the month on 13 September when at 0035 a sampan was detected heading southward on the Sai Tien River. The ambush team opened fire, killing both occupants and sinking the sampan. The SEAL Team LCM-3 immediately extracted the ambush team while conducting reconnaissance by fire of both banks of the river. One crewmember was slightly wounded when the LCM-3 received enemy small arms fire.

On 18 September at 0408, a reconnaissance team discovered a rebuilt base camp, previously destroyed in July. The camp consisted of several new huts, bunkers, water jugs and containers for keeping live fish. The camp had been inhabited recently, and was believed to be a rest station or troop staging area. The camp was destroyed again.
Game Warden Units

Five PBRs were added to the GAME WARDEN inventory during September to bring the total craft in country to 100. The boats, which arrived aboard SS RICE VICTORY on 27 September, were added to River Patrol Section 523. On 29 September Commander River Patrol Section 523 with the five additional PBRs reported operationally ready for the transit to Long Xuyen. On 10 September USS COMSTOCK (LSD 19) relieved USS TORTUGA (LSD 26) as GAME WARDEN support ship. On 26 September RIVERPACT 532 was activated at Cat Lo.

On 19 September modified Jacuzzi pumps were installed in three PBRs by manufacturer's technical representatives. A considerable improvement in speed was noted in these boats.

* * * * *
CONFIDENTIAL

COASTAL SURVEILLANCE FORCE

An average of 67 U.S. units were on continuous MARKET TIME patrols during the month. Two aircraft were continuously airborne on MARKET TIME patrols. Additionally, a daylight patrol of the South China Sea was flown during the dark phases of the moon. Forces were augmented by three additional PCFs.

EVIASION INCIDENTS

At 0335 on 7 September, USCGC POINT GREY detected a steel hull contact dead in the water off the southwest coast of Can Mau Peninsula 77 miles south of An Thoi. Fifteen junks surrounded the ship, but POINT GREY was unable to determine if any junks were alongside. When challenged, the vessel, which showed no running or range lights, got underway on course 130, at 17 knots. The junks dispersed.

The contact was visually identified as the French flag merchant ship TATIANA (7,026 gross tons). POINT GREY continued to shadow TATIANA but could not match her speed. USS NEWELL (DER 322) was dispatched to assist, intercepted TATIANA and delivered the message, "Your stopping in contiguous waters in junk concentration indicates possible violation GVN regulations. Request you follow me to Vung Tau."

TATIANA complied and upon arrival in Vung Tau was inspected by the Vietnamese Navy Third Coastal Zone Commander. Nothing suspicious was found. The Master and crew of 36 were French Nationals. The ship carried 2,800 tons of general cargo. The

1 See Appendix I for MARKET TIME Statistical Summary
Master stated that he had made the trip "a dozen times," using the same route and had seen junks but never had stopped.

The Master further informed the inspecting party that the ship was enroute from Sihanoukville, Cambodia to Hong Kong. However, a COMNAVFORV Intelligence check of the ship's agent's Saigon office indicated that TATIANA's port calls were changed prior to her arrival at Sihanoukville, from Hong Kong to Kobe, Japan. This contradiction of the Master's statement, plus the fact that the vessel did not show navigational lights and stopped in a large concentration of junks off a Viet Cong-controlled coastal area, added significance to this incident.

TATIANA was released by Vietnamese authorities at 2130 on 7 September. Intelligence records indicated that TATIANA did continue to Kobe, Japan vice Hong Kong.

At 2000 on 24 September, USCGC POINT GREY detected several sampans close to the beach 63 miles southeast of An Thoi moving south along the coastal area of the U Minh Forest. POINT GREY's Boston whaler, which was sent in to investigate the contacts, reported that several sampans were on the beach and that a flashlight signal was received from the beach. The whaler illuminated the closest moving target and three men jumped overboard and swam for the beach. When they did not heed warning shots, they were taken under fire. The sampan was destroyed by a large secondary explosion when it was taken under fire by the whaler. POINT GREY later received small arms fire from the beach. There were no friendly casualties; VC casualties were unknown.

1 COMNAVFORV msg 081040Z Sep 66 - Intelligence Summary 136-66
The following evasion incidents also were recorded during September:

14 - At 0100 PCF 66 detected a contact 19 miles south of Qui Nhon proceeding in a southerly direction along the coast. When PCF 66 closed and illuminated the junk, it evaded and ignored warning shots. The junk was destroyed by direct fire. Enemy casualties were unknown.

17 - At 1235 PCF 21 hailed and fired warning shots at two sampans attempting to evade to the beach 30 miles south of DaNang. When the sampans continued evasive tactics, they were taken under direct fire and damaged. Small arms fire was received from the beach during this action, but was not returned because of the proximity of a village. There were no friendly casualties.

21 - At 1650 USCGC POINT ARDEN hailed four junks 86 miles northwest of DaNang off the DMZ coast. The junks were not fired on as they evaded across the 17th parallel.

28 - USCGC POINT CLEAR fired on an evading junk 66 miles southeast of An Thoi when it failed to heed hailings and warning shots. Results were unknown.

OPERATIONS

Land operations supported by MARKET TIME forces during September were as follows:

14 - PCFs on routine patrol in areas 7E and 8C, approximately 100 miles southwest of Vung Tau, provided blocking forces for ARVN Operation DAN CHI 261.
CONFIDENTIAL

15-25 - PCFs and WPBs in area 1A1, adjacent to the DMZ coast, participated in Operation DECK HOUSE IV by providing coastal patrols and anchorage security for the amphibious force.

19 - At 1930 PCF 73 provided urgent evacuation for two United States Special Forces and 35 Regional Forces troops surrounded by Viet Cong 12 miles north of An Thoi.

23 - PCFs, patrolling just north of Qui Nhon in area 3E, provided a blocking force for the Operations WILDCAT and THAYER.

Eight ROUNDUPs were conducted in September by MARKET TIME PCFs and PACVs. In all cases, nothing suspicious was uncovered. The ROUNDUP operations were conducted in three areas. Between 13 and 15 September two ROUNDUPs were conducted in Vung Tau Harbor. Five ROUNDUPs were carried out in an area off the coast of Go Cong Province near the mouths of the Cua Tieu and Cua Dai Rivers between the 19th and 24th of the month. One ROUNDUP was effected off the coast of Phuoc Tuy Province, ten miles north of Vung Tau, on the 27th and 28th.

MARKET TIME units conducted two Search and Rescue operations during the month. On 17 September at 2130, two PCFs provided illumination in support of a SH. effort after two F4Cs collided 20 miles south of Nha Trang. One survivor was recovered. On 26 September at 1225, USCGC POINT KENNEDY assisted in the recovery of survivors of a downed U.S. Army helicopter 70 miles south-southwest of Vung Tau. Four survivors were recovered by
CONFIDENTIAL

POINT KENNEDY's small boat. U.S. personnel casualties were one killed, one wounded and two missing.

HOSTILE FIRE INCIDENTS

MARKET TIME units on patrol came under attack on only a few occasions during September. In no case was there personnel or material damage.

4 - At 2120 PCF 74 received automatic weapons fire from the north shore of Phu Quoc Island 22 miles north of An Thoi. Fire was returned resulting in a secondary explosion.

14 - At 1110 PCF 55 received approximately 50 rounds of machine gun fire 80 miles southeast of DaNang. Fire was suppressed.

17 - At 1840 PCF 87 received machine gun fire 15 miles north of Qui Nhon while closing a small junk moving along the surf line. Fire was returned, but the junk successfully evaded.

19 - At 1022 PCF 63 received small arms fire from the beach 45 miles north of Qui Nhon while closing to investigate a junk. Fire was returned. An observation aircraft reported that enemy casualties were one killed and one probable wounded.

NAVAL GUNFIRE SUPPORT

MARKET TIME units contributed naval gunfire support on ten occasions during the month. Friendly forces suffered no casualties and enemy casualties were unconfirmed or unknown.
At 1415 USCGC POINT JEFFERSON and PCF 57 conducted an unscheduled gunfire support mission 100 miles southwest of Vung Tau against an enemy troop concentration spotted by a FAC aircraft. Fifty-four rounds of 81mm mortar were expended.

At 1500 USCGC POINT SLOCUM fired 44 rounds of 81mm mortar in support of a reconnaissance aircraft receiving small arms fire 86 miles northeast of Vung Tau.

At 2050 PCF 51 expended 24 rounds of 81mm HE mortar in support of friendly forces 30 miles northeast of Nha Trang.

At 1030 USCGC POINT WHITE and PCF 37 supported a reconnaissance aircraft receiving ground fire 185 miles southwest of Vung Tau on the Ca Mau Peninsula by expending 67 rounds of 81mm mortar.

At 2205 PCF 50 provided urgent gunfire support for friendly forces under attack 35 miles north of Nha Trang. Twenty-five rounds of 81mm HE mortar were expended. At 0136 and 0615 the following day, the units provided additional fire support against enemy positions in the same area by expending 50 rounds of 81mm mortar.

At 1825 USCGC POINT DUNE provided urgent gunfire support 80 miles northeast of Vung Tau for a reconnaissance aircraft receiving ground fire. The aircraft reported that three of the enemy possibly were killed.
14 - At 1145 PCF 10 provided gunfire support for a reconnaissance aircraft under fire 50 miles east of An Thoi. The aircraft took two sampans in the area under fire. The PCF later provided first aid and evacuation for two civilians who were wounded by the aircraft fire.

18 - At 0730 PCF 57 observed ground fire being directed against a reconnaissance aircraft 15 miles north of Qui Nhon. PCF 57 suppressed the enemy fire with .50 caliber machine gun and 81mm mortar fire.

26 - At 1315 PCF 77 teamed up with USS SAINT FRANCIS RIVER (LSDR 525) in suppressing enemy fire directed against Coastal Group 16 units: 60 miles north of Qui Nhon.

30 - At 1430 USCGC POINT BANKS conducted a scheduled gunfire support mission against enemy positions on the west coast of Phu Quoc Island six miles north of An Thoi. Twenty-nine rounds of 81mm mortar were expended.

MARKET TIME UNITS

Three additional PCFs arrived in country this month, boosting the total number in country to 73. The new PCFs, numbered 87, 88 and 89, arrived in Qui Nhon aboard USS COMSTOCK (LSD 19) on 9 September.

The three PCFs were assigned to inshore patrols in area three which was realigned to provide seven vice six sub-areas. High hostile fire and junk activity in the area and the newly assigned boats were the factors that dictated the realignment.

In another realignment, offshore barrier lines in areas eight
and nine were moved to positions closer to the Ca Mau Peninsula and shipping lanes to better intercept and identify merchant ships.

USS WESTCHESTER COUNTY (LST 1167) relieved USS FLOYD COUNTY (LST 762) at Vung Tau on the first of the month. FLOYD COUNTY had spend 84 days on station servicing WFBs and PCFs in areas seven and eight.

On 10 September MIUWS (Mobile Inshore Undersea Warfare Surveillance) Unit 13 relieved MIUWS Unit 12 at Vung Tau.

On 20 September PACV (Patrol Air Cushion Vehicle) Division 107 chopped to CTF 115 for a one-month period of evaluation of three PACVs operating as MARKET TIME units.

USCGC POINT ORIENT was drydocked at DaNang for one day of emergency repairs. USCGCs POINT BANKS and POINT GANNET were drydocked in Bangkok for a 12-day routine maintenance check.

USS CURRITUCK (AV 7) established a seadrome on 3 September at Cam Ranh Bay. Patrol Squadron 50 flew SP5B aircraft on MARKET TIME patrols both north to the 17th parallel and south to Phu Quoc Island. CURRITUCK’s aircraft completed patrols scheduled by CTF 72 in conjunction with P3As based at Sangley Point, P.I. and SP2Hs flying out of Tan Son Nhut, Saigon. The SP2Hs are a task group under CTF 115, but the other aircraft are provided by CTF 72 for MARKET TIME operations on a periodic basis. The seadrome was disestablished on 27 September.

The following units were under OPCON of CTF 115 for patrol duties during September:

CONFIDENTIAL
U. S. NAVAL SUPPORT ACTIVITY, SAIGON

At most locations, construction on interim facilities at MARKET TIME and GAME WARDEN support bases neared completion during the month. Construction on permanent facilities moved ahead more slowly and in some cases was deferred.

At An Thoi, additional storerooms, bins and shelving were completed on APL 55. Construction of the Cat Lo mess facility continued as installation of electrical fixtures began. At Cam Ranh Bay the ninth BBQ building was completed enabling all personnel to move from tent city. The 1,000-man mess hall was completed except for the installation of equipment and fixtures. Construction continued at Qui Nhon as pile driving equipment, for waterfront work, arrived on site. Harbor defense facility improvements at Qui Nhon, Nha Trang, Cam Ranh Bay and Vung Tau continued with additional construction scheduled to begin on each base at month's end.

GAME WARDEN support bases reported continuing facility improvements during September. The pontoon causeway access to the Can Tho YFNB-9 was completed, as well as other modifications, to increase its utility. On 25 September a 50-room billet with galley and mess was leased to serve as an interim facility until permanent facilities are built. Vinh Long reported that 90 percent of interim construction was completed; however, Mekong River flooding hampered progress this month. Nha Be interim facilities continued to be taxed to a maximum degree. Construction of berthing spaces and installation of electrical wiring on YFNB-16
neared completion. Also at Nha Be, two skid mounted refuellers were installed to help meet the needs of the increasing helicopter operations. At Long Xuyen, fuel capacity was increased to 20,000 gallons with the addition of another fuel bladder delivered from Can Tho. A temporary boat ramp was installed at My Tho to assist in the supply of that base.

Advanced Base Functional Components (ABFC) material continued to be sent out to detachments, particularly to the GANE WARDEN bases. Reefers were distributed to Nha Be, Sa Dec, Can Tho, Long Xuyen and Vinh Long. Supplies from the warehouses of Saigon reached the various bases on trucks, airplanes and the support ships USS BLUE BIRD (MSC 121), USS MARX (AKL 12) and USS BRULE (AKL 28).

In Saigon, COMNAVFORV announced that permanent construction at Vinh Long and Sa Dec would be delayed, and that the projected detachment at Chau Doc would take form as a floating base.

On 23 September a conference of COMNAVFORV, COMFAIRWESTPAC and NAVSUPPACT representatives was held to review the proposed COMFAIRWESTPAC listing of items and functions regulated by the Inter-Service Supply Agreement (ISSA) with the Army and the Air Force. As a result, it appeared that a number of functions listed can be resolved through a host-tenant memorandum of understanding.

During the month a Planned Maintenance System was installed at all GANE WARDEN and MARKET TIME bases. Teams made up of representatives from PHIBPAC, NAVSHIPSYSOON and NAVSUPPACT visited
each of the bases. All bases received initial outfitting stocks of boat spares early in the month.

Shortages of technical personnel for maintenance and repair at outlying bases remain a major problem. Generally, berthing and messing facilities at most bases improved during the month with additional bunks and lockers coming into supply and construction of new facilities continuing.

Special Services processed 160 rest and recreation trips and delivered movie projectors, tape recorders and other entertainment equipment. Throughout Vietnam an increase in the quality and reception area of Armed Forces Radio Television Service programming provided additional recreational services. At Qui Nhon, for example, new television facilities were implemented and TV receivers were purchased for immediate use.

* * * * *
Psychological operations and civic action projects continued to increase during September as more personnel and material became available.

The personnel of Naval Support Activity, Saigon established a type of Community Chest fund drive to make building improvements on an elementary school for blind girls in Saigon. In addition to providing funds, the men used off-duty hours on weekends to clean and paint the entire school. Over 50,000 piastres have been pledged to support the school on a monthly basis. This pool of funds and labor also will be available for other civic action programs.

Many units throughout Vietnam supplied candy, cakes, toys, candles and lanterns to children in observance of "Trung Thu" or children's festival which was celebrated during the week of 23-29 September.

A MEDCAP team, composed of U.S. Army doctors and U.S. Navy and VN Navy corpsmen, was organized in the Qui Nhon area. Two visits were made by the team in September. Forty-six patients were treated on board a PCF near Degt Village in Binh Dinh Province during the first visit. In a visit to Poulo Gambir Island, 205 patients were treated.

Personnel of USN Mobile Construction Battalion ONE built a schoolhouse at Boc Minh Hamlet during their off-duty hours.

1. Construction projects completed during report period. Those repaired or renovated are marked with an R.

Advisors reported that the overall ability of the Vietnamese Navy to accomplish assigned tasks remained satisfactory during September.

On 8 September, Lieutenant General Cao Van VIEN assumed the post of Commander-in-Chief of the Vietnamese Navy. The initial reaction was that the Navy had lost face. However, as the moderate elements made themselves felt, many considered that the assignment of the General might be beneficial as this would give the Navy a better opportunity to present its problems before the Joint General Staff.

On 30 September, VNN Headquarters reported that it had 15,410 men assigned. The distribution of these men within the VNN continued to be unsatisfactory. However, desertions declined for the third consecutive month. This month the VNN had 80 deserters as compared with 107 for August.

Leadership within the VNN continued to follow the same trends indicated for August. A limited number of Fleet Command Officers, including the commanding officers of PGM 602 and ISSL 228, demonstrated continued excellence in the performance of their duties. Many other officers continued to show a deficiency in leadership and initiative. The performance of Coastal Group officers ranged from good to excellent with some exceptions. Petty officer initiative and leadership were still below a satisfactory level.

Operational reports indicated that most VNN units are suffi-
ciently trained to carry out their assigned missions. The VNN Fleet Command instituted a Prospective Commanding Officer/Executive Officer Course for PGM officers on 16 September and will utilize in-port PGMs as training ships. Fleet Command advisors conducted a one week English language training program for the newly commissioned VNN Ensigns in an effort to improve their language capability prior to their reporting to SEVENTH Fleet units for on-the-job training.

Most Coastal Groups reported a lack of adequate training programs. Only half of the Coastal Group advisors stated that their units were adequately trained to carry out their assigned missions.

Ashore training commands continued to have problems with inadequate berthing and messing facilities and instructional capabilities. The most pressing problem at NTC, Nha Trang is the inadequate water and sewage facilities. Training aids are also inadequate. The school library, previously open only during working hours, is now open at night and on weekends. The book supply is slowly improving in quantity and quality and greater utilization of this library and study hall was noted. With the arrival of a new VNN NTC Commanding Officer, many special projects have been initiated to improve facilities and morale.

The CY 1966 Vietnamese Construction Program continued to move slowly. Erection of one hundred prefab buildings at Coastal Naval Zone sites is now underway. The first five prefab buildings were sent to the Coastal Surveillance Center, Nha Trang and are being
erected under U.S. advisor guidance. The CY 1967 Construction Program was submitted to RVNAF JCS, J-4, in September.

A total of two Yabuta junks have now been completed under the Junk Construction Program. An additional fifty-eight are authorized. The planned production rate of one Yabuta junk per week has not been attained.

OPERATIONS

The Vietnamese Navy Coastal Groups maintained a high level of activity, particularly the Coastal Groups in the First and Third Coastal Naval Zones. During September, the Coastal Groups of the First Coastal Naval Zone set 108 base defense ambushes. From 5 to 6 September a search operation, organized by two U.S. Marine companies and Coastal Group 15, took place in the Hung Quat Bay area 50 miles southeast of DaNang. The Coastal Group had no casualties and captured one Viet Cong and four suspects. The U.S. Marines had no casualties. They captured two Viet Cong and thirteen suspects and destroyed one mine booby trap and two tunnels. The enemy had five killed.

On 8 September Operation QUYET THANG 24/6 was organized by the Fourth Infantry Regiment on the east coast of Ho Duc District. Participating forces included U.S. Marines, Quang Ngai sector forces and Coastal Group 16. The operation ended on the evening of 9 September. Coastal Group 16 had no casualties while checking 180 junks and 622 people, seventeen of whom were detained as Viet Cong suspects. The friendly unit had six wounded and captured five Viet Cong and eight small arms. The Viet Cong suffered twelve killed.
In the Second Coastal Naval Zone, Coastal Groups carried out their assigned missions of coastal surveillance and of counter-infiltration patrols.

Activities of Coastal Groups 34/37 and 35 highlighted activities within the Third Coastal Naval Zone. At 2320 on 2 September, the Viet Cong attacked Coastal Groups 34/37 with 60mm mortars, automatic weapons and small arms fire. One aircraft was called in and dropped flares while artillery at Ba Tri provided supporting fire. The enemy withdrew after one hour and left two killed. The Coastal Groups had one killed and five wounded, three of whom were female dependents.

On the morning of 5 September, boats of Coastal Groups 34/37 and 35 provided support for a civic action squad from My Luong Village, which had been ambushed by the Viet Cong. The civic action squad had two killed and one wounded. On 14 September Coastal Group 35, coordinating with a raider company and two Regional Force companies, conducted a search operation 18 kilometers south of Tra Vinh. The friendly unit had one wounded and detained one Viet Cong suspect. On the evening of 22 September, Coastal Group 35 was attacked with small arms fire. A counter attack was organized and support was provided by PGN 613. The Coastal Group had one man wounded. Enemy casualties were unknown.

The Fourth Coastal Naval Zone conducted three amphibious operations and participated in several firefights. At 0920 on 11 September, the patrol junks of Coastal Group 43 had a firefight with the Viet Cong six kilometers north-northwest of Kien An on the Cai Lon River.
PC/PCEs were utilized for coastal patrol and gunfire support in all four Coastal Naval Zones and were responsible for carrying out eleven NGFS missions. PGMs were utilized for an unusually varied number of tasks, including escort, MEDCAP, river and coastal patrol, base support and NGFS missions. On 30 August, PGM 602 transported a medical team and government officials from Phan Thiet to Poulo Cecille de Mer (Hon Cu Lac), an island with a population estimated to be ten thousand. In a two day stay, the medical team examined 1,000 patients while government officials presided at the opening of two schools. On 1 September, PGM 602 returned to Phan Thiet, transporting a number of the more seriously ill islanders to the hospital there.

LSIL/LSILs provided river and coastal patrol, gunfire support, escort and election security missions in the Rung Sat Special Zone, Fourth Riverine Area and First Coastal Naval Zone. LSSL 228 maintained its reputation as one of the most active and aggressive of the Vietnamese Navy ships by firing several gunfire support missions in the Rung Sat Special Zone, providing election security and beach support for Dong Hoa Village and Ly Nhon Village, blocking the Dong Tranh River, taking part in Operation RUNG SAT 34/66 and, in company with PGM 606, giving assistance when HJMS 156 was mined by the Viet Cong on 28 August.

MSCs were deployed on coastal patrol in the First and Second Coastal Naval Zones. MLCEs, utilizing chain drag techniques, provided daily minesweeping patrols on the Saigon and Long Tau Rivers.
There were four operations conducted in the Rung Sat Special Zone during September. Operation BATON ROUGE (RUNG SAT 37/66), the most aggressive of the operations, commenced on 4 September and did not terminate until 8 October. Boats of RAG 22 and 28 provided daily troop lift for U.S. forces and acted as a blocking force when required. The operation was successful in destroying numerous Viet Cong camps and ambush sites. On 14 September, eleven boats of RAG 22 participated in RUNG SAT 37/1/66 which provided security on the Long Tau River during the passage of the Federal Republic of West Germany Hospital Ship HELGOLAND from Vung Tau to Saigon. No unusual incidents occurred.

Four operations took place in the Third Riverine area. Three were conducted by RAG 24: DONG PHONG, AN DÂN 193/66 and XAY DUNG; and one conducted jointly by RAG 24 and 28, AN DÂN 214/SD. Operation AN DÂN 214/SD was organized by the ARVN 46th Regiment 10 kilometers west of Can Giuoc with 13 river craft of RAGs 24 and 28 participating. It started on 25 September and terminated on 28 September. The friendly unit had five killed and 27 wounded. One Viet Cong was detained. The friendly unit captured 1,000 meters of electrical wire and 50 batteries and destroyed a quantity of grenades and a number of tunnels.

In the Fourth Riverine Area, RAGs participated in nine operations. Operation CAN CHI 261/SD was conducted 18 kilometers south of Bac Lieu by ARVN regular, Regional Force, sector forces and seven river craft of RAGs 25 and 29 from 14 to 18 September. The VNN lost an LCVP, HQ 2037 of RAG 25, which was mined while
carrying troops on 17 September, and had a total of five wounded during the operation. The friendly units had six wounded and lost one AD6 fighter aircraft which crashed. Viet Cong losses were reported as 51 killed (body count) and 18 Viet Cong and 24 suspects detained. The assigned forces captured nine individual weapons, twenty-one grenades, seven mines, a quantity of ammunition, two boxes of western medicine, fifteen pair of canvas shoes, six long-shaft boat motors, five cans of kerosene, one Russian flag, 580 kilograms of rice, some medical equipment and documents. One liaison station, one military hospital, one first aid station, ten houses, one junk, 2300 liters of gasoline and three grenades were destroyed.

Three new River Assault Groups: 31 at Vinh Long, 32 at Long Xuyen and 33 at My Tho, have been commissioned and are now being assigned river craft and personnel. This will bring the total number of RAGs in the Fourth Riverine Area to nine when outfitting is completed.

LDNN (UDT) conducted two hydrographic reconnaissance missions and one salvage and demolition operation in September. Hydrographic reconnaissance missions were conducted at Phan Thiet on 6 September and at Gia Lin, near Bong Son, 9-13 September. Support for the latter mission was provided by ARVN 40th Armored Artillery Regiment. From 21 to 28 September, six LDNN salvaged a variety of equipment from the LCVP, HQ 2037, of River Assault Group 25, which was sunk by a mine on 17 September, and then destroyed the hull, utilizing forty pounds of C-4 explosive.
MAINTENANCE AND LOGISTICS

Routine maintenance aboard Fleet Command units continued to show improvement. Aboard PGM 603 exceptional progress was made, especially the maintenance of the ship's generators. Other ships continued to show progress in their willingness and ability to effect repairs without requiring technical or supply assistance.

During September, eight casualties on six fleet units were repaired by ship's force. Engineering practices of ship's force also showed improvement. Some fleet units were completing patrols six weeks in length without experiencing any major engine casualties.

Coastal Group routine maintenance showed improvement, but continued to be barely satisfactory. Preventive maintenance was all but non-existent, due primarily to a lack of high usage parts and to the lack of understanding of the principles of preventive maintenance.

Plans for the establishment of supply depots at each repair facility came to a standstill due to the change of VNN CINC. The U.S. advisors continued to make field visits to the Coastal Naval Zones and Riverine Areas in order to gather information for the writing of procedures for the project. It was evident that the Vietnamese supply distribution system would show little or no improvement until supply depots are established and the Vietnamese designate one or more ships for supply distribution purposes.

The excess program, designed to remove obsolete parts from the supply system and to sell scrap material at the shipyard, was placed in effect.
During September logistic ships were not efficiently utilized. Total cargo lifted was 4,986 tons, a decline of 1,721 tons from August. Total personnel lifted was 5,703, a decline of 4,002.

There were two main reasons for this decline. There was a lack of pier and beach loading facilities. Of the four facilities available, Beach Golf was blocked by a dredging operation for the last two weeks of September and Tu Do Pier was occupied by the West German Hospital Ship HELGOLAND since 14 September. In addition, delays on the part of the Vietnamese Joint General Staff, J-4, in assignment of cargo resulted in the stagnation of LST movement. However, overall ability of logistic ships to move men and supplies remained the same as last month.

On 22 September LCVs 533, 536 and 538 were detached to the Fourth River Zone to aid in the evacuation of flood victims.

VIETNAMESE MARINE CORPS

Task Force Alpha, comprised of a Headquarters, the Third and Fourth Vietnamese Marine Battalions and "C" Battery, VN Marine Artillery Battalion, continued operations in the I Corps Tactical Zone, participating in Operations LAM SON 310, 314 and 316 and performing road and rice harvest security assignments. In Operation LAM SON 310 from 2 to 4 September, the Task Force landed in the objective area immediately south of Pho Trach utilizing U.S. Marine helicopters. Twelve Viet Cong/North Vietnamese Army were killed while the Task Force incurred two killed and 13 wounded. Four individual and two crew served weapons were captured.

The Task Force remained in the vicinity of Pho Trach until
18 September, conducting saturation patrols and road and rice harvest security. During this period six Marines were killed and four were wounded due to enemy action, while VC/NVA casualties were unknown. From 18 September to 25 September, Task Force Alpha participated in Operation LAM SON 314 in the vicinity of Cam Lo and the Demilitarized Zone. Two VC/NVA were killed, one was captured and one machine gun, three automatic rifles and one rifle were seized. One Marine was wounded.

On 27 September the Task Force was assigned as reserve for Operation LAM SON 316, and remained in the vicinity of Dong Ha. On 30 September the Task Force Headquarters was mortared, resulting in four Marines killed and 23 wounded. Two U.S. Marine advisors were also wounded. On 30 September the Task Force, less "C" Battery and the Task Force Commander, was replaced by Task Force Bravo and returned to Saigon.

Task Force Bravo, comprised of a Headquarters, the First and Fifth VN Marine Battalions and elements of "B" Battery, VN Marine Artillery Battalion, conducted search and destroy operations in the Capital Military District on 6 and 8 September. One Viet Cong was captured and fifteen suspects were detained. On 9 September the Second Battalion replaced the Fifth Battalion; and a search and destroy operation was conducted in the CMD. No enemy contact was made; however, two Marines were wounded by friendly fire. From 10 September to 12 September the Task Force provided security for the national elections at strategic locations in and around Saigon. Task Force Bravo was then dissolved until 30

CONFIDENTIAL - NOPORN
September when it was airlifted to I CTZ to replace Task Force Alpha.

The First Battalion also participated in several operations under the control of Capital Military District. On 3 September and 4 September the Battalion participated in an operation with ARVN units east of Saigon resulting in three Viet Cong killed; while four Marines were killed and six were wounded. On 9 September three Marines were killed and two were wounded when their jeep struck a mine 1200 meters from the Battalion base camp at Thu Duc.

The Fifth Battalion, when not attached to Task Force Bravo, operated in the Capital Military District. On 7 September the battalion command post and defensive positions at Ba Hom were attacked by a Viet Cong force using mortars and automatic weapons. In a brief engagement one Marine was killed and four were wounded. The battalion also provided security during the National Elections. During the period of 20 September to 27 September, the Fifth Battalion worked with the National Police apprehending deserters and draft dodgers in the Saigon-Cholon area.

The Sixth Vietnamese Marine Battalion was formed on 1 September and for the remainder of the month continued to build its personnel strength and equip and train at its base camp in Thu Duc. The units also worked to improve the habitability and security of the base camp. Operations were limited to patrols and ambushes incidental to the defense of the camp.

On 21 September ten Dong Nai plastic assault boats with one
officer and fifteen enlisted men of the Motor Transport Company were sent to the Rung Sat Special Zone to assist in assault operations during Operation BATON ROUGE. On 22 September twenty Dong Nai boats with one officer and 22 enlisted men were airlifted to Vinh Long in the IV CTZ for flood relief work.

The Morale of the Vietnamese Marine Corps continued to remain high throughout the month. Officers and junior enlisted men continued to meet the challenge of prolonged commitment and sacrifice in a fully professional and capable manner. Leadership within the Vietnamese Marine Corps was excellent.¹
