3. (c) OPERATIONS:

a. MISSION: 01 AUGUST - 31 OCTOBER 1968 - The 1st Brigade continued the security mission of LZ's BETTY, SHARON, PEDRO, ANNE and TIMESTONE, augmented the security forces of the GA and NHUNG Bridges, assisted the 1st ARVN REGT and GVN Authorities in the security of Engineer efforts and pacification activities during the construction of the roadway to the village of GIA DANG, and participated in operations against the VC infrastructure.

b. EXECUTION: The Brigade continued offensive operations in its assigned AO. During the reporting periods elements performing base security were held to a minimum in order to provide a maximum number of troops for maneuver and offensive operations. During the day platoons on LZ Security were combat assaulted into the AC and air-lifted back to the LZ in the late afternoon. Bushmaster Operations were emphasized with ambushes ranging from squad to platoon size. In addition to normal operations, coordinated operations were encouraged and conducted with the 1st ARVN REGT and local PF and NPF Forces.

c. DISCUSSION AND ANALYSIS OF SIGNIFICANT OPERATIONS:

   (1) During the reporting period "CORSAIR", "SKAPOP", "MINI-CAV", and "VIETNAM" operations have been extensively employed throughout the Brigade AO in a concentrated attack on the VC infrastructure. These operations, as part of the "PHOENIX PROGRAM", have been based on intelligence provided by the Triu Phong DOOC and ARVN and US Sources, and have utilized to the maximum ARVN Forces, Popular Forces, and National Police Field Forces.

   (2) On 29 AUGUST 1968 the 1-8 Cav combat assaulted to VIC TD 197407 establishing firebase CINDY, air lifting Btry A 2-19th Arty in position late in the day. The 1-8 Cav (-) combat assaulted into the DA LONG VALLEY initiating offensive operations which disclosed only five (5) trails heading north and south. The operations took place in varying terrain, i.e., elephant grass 3-14 feet in height (valley floor), scrub brush (foot hills), and extremely heavy jungle in mountainous areas. On 30 AUGUST Artillery was air lifted to LZ CINDY completing the fire base.

SUDJECT: OPERATIONAL REPORT - LESSONS LEARNED 1 August - 31 October 1968

(3) The Brigade has maintained close and continuous coordination with the 1st ARVN REGT. During this reporting period the Brigade assisted in combat assaulting one (1) Battalion size ARVN element in the vicinity of the "STREET WITHOUT JOY", and two (2) Battalion size elements assaulting into the mountainous terrain south of the DA LONG VALLEY. In addition to the above, daily combined "CORDONS", "SWOOPERS", "SEARCH & CLEAR" Operations were conducted with great success.

(4) During the month of OCTOBER the 1st Brigade participated in Operation "FISHER" (the GIA DANG Settlement Project). The Brigade's mission was to assist in the security of the construction effort of the GIA DANG development and the road leading from the settlement site to QUANG TRI City. In providing the security for this construction effort the Brigade conducted numerous "SELECTIVE SNATCH", "SWOOPER", and "CORDON" Operations throughout the "STREET WITHOUT JOY" and Beach area. The majority of these operations were joint operations utilizing ARVN Forces, Popular Forces, and US Forces. In addition to providing security these operations enhanced the working relations between the US and Vietnamese forces and greatly contributed to the pacification program in the TRIEU PHONG DISTRICT.

4. (C) TRAINING:

During this reporting period the Brigade Training Program emphasized the following: (a) Flame Thrower Training, (b) Anti-Tank Training to include firing of the 106mm Recoiless Rifle, the 90mm Recoiless Rifle, and the M-72 LAW, (c) booby Trap Training, (d) Night Operations (to include combat assaults, ambushes, and night attacks), (e) and Repell Training for select personnel within the Infantry Battalions. Because of the command emphasis that is placed on conducting a diversified training program the 1st Brigade is prepared to meet any contingency that may arise.

NOTE: Negative Escape and Evasion Training was conducted.

5. (C) INTELLIGENCE:

a. ADMINISTRATION:

(1) The Brigade continued operations in the "WEB STUART III" AO with moderate contact. National Police Field Forces, Special Branch Police, and Popular Forces Units have provided valuable assistance in all "CORDON" and "SEARCH" Operations against the VC Infrastructure. A platoon of NPPF, GPCOM to the 1st Brigade, is used on a daily basis to assist US elements.

(2) The Brigade has continued the use of Long Range Reconnaissance patrols in the western portion of the AO with three (3) Operational Teams.

(3) The informant program for QUANG TRI Province is supervised and controlled by QUANG TRI Sector Headquarters. The Brigade Intelligence Section has daily liaison and direct communications with the 1st ARVN REGT, and with Sector and District Headquarters. All reports collected by QUANG TRI Sector and District Intelligence Agencies are relayed to the Brigade. The Brigade S-2 Section, in turn, provides them with pertinent intelligence gathered from the Brigade and Division resources.
(4) The 1st Brigade has continued to participate in the PHOENIX Program. A daily joint intelligence briefing is held at Sector S-2. All elements within the QUANG TRI City area attend the briefing. This provides for an immediate and accurate exchange of information regarding enemy activity in the area. The DIOC from Trieu Phong (D) has been a valuable asset in targeting enemy locations. The DIOC at MAI LINH is also operational.

(5) The Brigade has attached one (1) platoon of NATIONAL POLICE Field Forces Personnel. Requirements beyond one (1) platoon are filled by QUANG TRI Sector.

(b) ENEMY CAPABILITIES: (QUANG TRI)

(1) Conduct a limited attack on District Headquarters and major GVN Installations within the QUANG TRI City area, utilizing "hit and run" tactics with the equivalent of one (1) Regiment to support the action.

(2) Conduct extensive stand off attacks on QUANG TRI City, LA VANG and the AI TU Airfield area, utilizing 122mm rockets, 62mm mortars and 60mm mortars.

(3) Conduct harassing attacks along lines of communication with emphasis on road mining, interdiction of fuel pipelines and destruction of key bridges along Highway #1.

(4) Conduct isolated attacks against Popular Forces outposts, RT Teams and New Life Development Hamlets neighboring Quang Tri City.

(5) Conduct guerrilla operations in all areas in the vicinity of QUANG TRI City.

(6) RECENT TRENDS: The NVA Units along with the Main Force Battalions and VC local force units have completed their rice harvest. The Rice Denial Program has effectively denied the VC and NVA Units vast amounts of rice that they normally received and transported to the NAR LANG Jungle area. The full effect of this operation will not be seen until a later date when their present supplies are expended. The enemy has sought to avoid contact, in preparation for an autumn offensive in August 1968.

(1) Total flight hours (1260) represents the highest flying hours accumulated by the Aviation Platoon since its arrival in Vietnam. Records were also set for total tasks, total sorties, and average flight hours per day.

(2) Average flight time per aviator for the month was also a new record-136 hours; the median was 1313 hours. In fact, 10 aviators accumulated over 120 flight hours, the USARV recommended maximum. Highest time aviator was WO Christianson, 1/8 Aircraft Commander, with 177 hours.

(3) Aircraft availability was an excellent 85% for UH-1H helicopters, 71% for OH-13 helicopters, and 83% for OH-6A helicopters. Although individual categories of aircraft have each had higher availability rates (92% for UH-1H in Dec 67, 83% for OH-13 in Jan 68, and 95% for OH-6A in July 68), overall aircraft availability for the unit has never been higher, 80%, which compares to the Division average of 59%.

(4) Equipment deadlined for parts (EDP) rate was 0% for UH-1H, 3% for OH-13, and 8% for OH-6A. Tail rotor replacements are not expected until October, and most of the 8% EDP is due to one OH-6A being down awaiting tail rotor replacement.

(5) The Brigade Scouts accounted for 25 NVA/VC KIA during the month.

SUDJECT: OPERATIONAL REPORT - LESSONS LEARNED 1 August - 31 October 1968

(1) Average flight time per aviator for the month was 82 hrs. The highest time aviator was WO1 Sullivan, a Brigade Scout Aviator, with 129 hrs.

(2) Aircraft availability was 68% for UH-1H helicopters, 61% for OH-6A helicopters, and 60% for OH-13 helicopters. The lower availability rate was a reflection of increased field maintenance down time. This aggravated by the shortage of personnel in the 15th TO Bn, and to a degree by the shortage of parts as reflected in the increased EDP rate. To alleviate these problems, this unit is attempting to program aircraft into field maintenance so that at any given time only one UH-1H and one OH-6A will be in field maintenance at a time. The remaining aircraft will be flown on a staggered basis to permit the above concept.

(3) Equipment deadline for parts (EDP) rate was 13% for UH-1H, 13% for OH-6A, and 11% for OH-13 helicopters.

(4) The Brigade Scouts accounted for 4 NVA/VC KIA during the month.

(1) Average flight time per aviator for the month was 43 hours. The highest time aviator was, WO-1 Berry, a Brigade Scout, with 122 hours.

(2) Aircraft availability was 57% for UH-1H helicopters and 79% for OH-6A helicopters. All OH-13S helicopters were turned in during this month. The lower rate for UH-1H helicopters reflect an increase in the EDP rate at field maintenance level. By programing aircraft to fly on a staggered basis an improvement is being made in the availability rate overall and can be particularly noted in the availability rate increase for OH-6A.

(3) Equipment deadline for parts (EDP) rate was 5% for UH-1H and 4% for OH-6A helicopters.
